

April 10, 2025

Dear \_\_\_\_\_

I support the Point Reyes Farmers who have been evicted in a lease settlement and are being forced to move out. Please support them alongside your constituents in an effort to simply give these farmers an opportunity to stay in business and relocate elsewhere. The initial timeline of 15 months was an impractical and lofty expiration date in today's climate.

Straus Milk has been attempting to secure ranches alongside the few farmers that wish to stay in business and simply need more time.

Rather than force the closure, these farms need an extension to be able to move their multi-generational family farm.

We stand alongside the community fighting for these farms to stay in business and have an opportunity to relocate in a feasible amount of time. ***We are asking for your immediate help to get that timeline extended to July 31, 2027 to support the successful relocation of these farming operations.***

***Please provide urgent help to keep these small multi-generational family farms.***

Sincerely,
