

**Did you  
know**

**John Mueller, from Google has a simple tip to help new sites get picked up faster. 💡**

**If you don't have  
content on your site,  
you should keep your  
DNS disabled until  
you're ready for your  
site to be indexed. 🌐**

**Don't use generic  
server holding pages.  
These act like parked  
domains and will delay  
Google recognising  
your eventual site. 🛑**

**Instead of a generic holding page, use a custom one. This speeds up the indexing process. ⚡**

## **More tips**

- **Submit your sitemap to Google Search Console**
- **Keep your sitemap updated**
- **Follow Google's guidelines for best results**

**Imagine  
Better.**
