

**Did you
know**

**Google is now
including sponsored
products in its AI-
generated search
results? 🤔**

**This means you'll start
seeing product
recommendations
alongside helpful tips
and information. 💡**

**Searching for "*how to
remove a grass stain*"?
Google's AI might
suggest helpful
products under a
"sponsored" section. 🧼**

**These ads aim to
"connect users with
relevant businesses,
products and
services" exactly
when needed. **

**For now, this feature
is rolling out in the US
on mobile. 📱**

Microsoft's Copilot chatbot is also incorporating ads in its chatbot. 

**Imagine
Better.**
