Reduce the Risk

Dryer fires are an all too common occurrence, resulting in over \$80 million in property damage annually. It is our goal to reduce the risk of a dryer fire. That is the purpose of offering this dryer vent maintenance plan.

Convenience

There is no remembering, we do that for you. Simply let us know your preferred contact method of phone call, text message or email and we will reach out to schedule your annual dryer vent cleaning each year.

Peace of mind

Every dryer vent cleaning will be performed by a technician that is C-Det certified through CSIA. Rest assured, your dryer will be venting safely and efficiently at the end of each visit.

Dryer Vent Maintenance Plan

Includes

Annual dryer vent cleaning

Additional Benefits

20% discount off any other services

We will remember to schedule for you

Pick your contact preference for scheduling

Request your preferred technician

Only
\$99
a year

- ◆ Plan is good for 1 year from purchase and includes the next dryer vent cleaning.
- ◆ We will attempt to schedule your cleaning in the months surrounding your plan expiration. Example— if your plan would expire in July—cleaning may be scheduled any time between June and August.
- ◆ If your contact information changes, it is your responsibility to inform us. If we are unable to get a hold of you for scheduling, the cleaning may be forfeited.
- ◆ Plan discounts may not be combined with any other discounts or offers.
- ◆ Plan is prepaid and is non-refundable.
- ◆ If you move to a new home within our service area, the plan fee will be converted to a credit on your account to use toward future services.
- ◆ If you move out of our service area, plan may be transferred to new homeowners.

Dryer Vent Cleaning Process

Optional dryer vent services

- **Replace dryer duct with code compliant materials**
- **Replace transition duct with non-flammable duct**
- **Installation of dryer vent covers**
- **Installation of bird guards**
- **Cleaning of interior of dryer**

Other Services

Air Duct Cleaning

We use top of the line equipment to clean your ductwork. With your ductwork under negative pressure, we use air tools to agitate the debris as it gets sucked outside to our truck. We recommend cleaning every 7-10 years.

Air Filtration

Your air filter is a key component in maintaining healthy indoor air. Quite often, we find a poor quality filter, poor fitting filter or leaky filter rack. All of these will allow dirt into your system and household. We solve all 3 problems with the Aprilaire filter. And if the indoor coil needs cleaning in the next 10 years after install, we do that for free.

Air Quality Improvements

Air Purification

Suffer from allergies? We install an air purifier with no maintenance and no harmful by-products. You will breathe easier as it cleans the air throughout the whole home.

Blower Wheel Cleaning

Dirt getting by your filter? The first place it ends up is on the blower wheel. This reduces airflow and system efficiency. We can remove and clean the blower wheel.

Evaporator Coil Cleaning

If your air filter is not up to the task, all that dirt ends up on your evaporator coil, reducing airflow and system efficiency. We provide indoor coil cleanings.

Efficiency Improvements

Air Duct Sealing

The average ductwork system leaks 10-30% of its air. This is a huge waste when the ductwork is located in the crawlspace. We are able to seal your ductwork to improve comfort and your system efficiency.

Attic Insulation

A poorly insulated attic results in high energy bills. Today's standards call for an R-49 insulation value, which is approximately 13-14 inches of insulation. We use blown-in cellulose insulation to achieve this. We provide free inspections and estimates.

Everything Ductwork

Repairs

Whether your ductwork is rusted through, aged or full of mold, we have solutions. We can repair or replace damaged ductwork. Not sure about the condition of your ductwork? Ask about an inspection

Prior to 2006, bath exhausts did not have to vent outside. A home inspector will require this to be updated. We can install duct and vent it to the outside of your home per code.
