To Whom It May Concern,

I am pleased to offer my strong recommendation for Accurate Construction Management (ACM) based on my experience working with their team during the construction of our new school, Hares Hill Elementary in the Phoenixville Area School District. This is a large and complex facility designed to serve up to 700 students, and ACM played a critical role in making the project a success.

ACM was consistently present and supportive throughout every phase of the project — from preconstruction planning through active construction and final completion. Their team was accessible, responsive, and solution-oriented from the very beginning. They took time to explain processes, anticipate challenges, and ensure that decisions were made with both short-term execution and long-term building performance in mind.

Most importantly, ACM provided outstanding support during our transition into the new school while the building was occupied. They carefully coordinated punch list items and warranty work around the daily operations of a functioning school, always prioritizing safety, communication, and minimal disruption to students and staff. Their follow-through after occupancy demonstrated a true commitment to the success of the project and the people it serves — not just the construction itself.

Throughout the project, ACM maintained a highly collaborative approach and fostered a genuine family feel among the project team, while still demonstrating the professionalism, technical knowledge, and organizational expertise required to manage a project of this scale. They worked closely with district staff, contractors, and school leadership, creating a partnership atmosphere built on trust and accountability.

I would confidently recommend Accurate Construction Management for any major construction project where coordination, flexibility, and stakeholder collaboration are essential.

Sincerely,
Kyle J. Worrell
