## 1. Introduction

The right of American Citizen to cast a secret ballot is held in high regard, and is even codified in state and federal statute. Organized crime, bribery, power, tumult, or other improper practice must be eliminated as a possibility in U.S. elections to guarantee a voter's right to cast a ballot in secret and free of intimidation.

## 2. Issues and Solutions Related to Ballot Secrecy

- **Ballot Secrecy:**
  - **Issue:** Ensuring an auditable paper trail as mandated by the Help America Vote Act while offering the guarantee of best protection and anonymity for each voter's ballot.
    - Case Law outlines that AUDITABILITY comes BEFORE BALLOT SECRECY
    - Ballot Secrecy cannot be used to cover up fraud.
    - Voting By Precinct allows the best of both Ballot Secrecy and an Auditable Paper Trail.
  - **Solution:** Implement in-precinct voting only, eliminating countywide voting/vote centers to preserve audibility and ballot secrecy by keeping all ballots of a given voting precinct together. This eliminates the need for reconciliation of voter's ballots by precinct from polling locations, reduces time and cost of recounts and audits and removes the need to redact what are supposed to be anonymous ballots. These practices adhere to state and federal laws relating to BALLOT SECRECY, AUDITABLE PAPER TRAILS, and ACCESS TO PUBLIC RECORDS.

## 3. Project Specifics

<p><i>Project Scope</i></p>	<p>Throughout the 2024 Election Cycle and into the next Congressional Session and in Target Swing State's Next Legislative Sessions.</p> <p>Offering numerous methods of voter education on these topics, highlighting the aim to protect and secure the Vote in November via Mailers, Social Media, Canvassing Teams with Talking Points and Literature for the Organization, Speaking Engagements at Local Area Clubs.</p> <p>Social Media Boosting Campaigns, Meetings with Local, State and Federal Leaders to ensure precinct-level auditability is strengthened.</p>
<p><i>Project Constraints</i></p>	<p>Voter Information: Media will slander this as Voter Suppression without evidence.</p> <p>We have numbers to show voter turnout has dropped since Vote Centers were implemented in Texas.</p> <p>Short Period of Time: Mere weeks to secure precinct level auditability at the county level. This is already state law, we are simply guiding them back to following the statutes as opposed to Secretary of State Guidance.</p>
<p><i>Deliverables</i></p>	<ul style="list-style-type: none"> <li>● State Legislation mandating the use of voting precincts, allowing counties to organize and cast ballots by precinct as best they can to ensure BALLOT SECRECY, AUDITABILITY, and ACCESS TO PUBLIC RECORDS.</li> <li>● Federal Legislation mandating the use of voting precincts for full auditability.</li> <li>● State Legislation BINDING the Secretary of State to the Will of A DULY ELECTED LEGISLATURE.</li> <li>● Federal Statute BINDING the EAC to the Will of A DULY ELECTED LEGISLATURE.</li> <li>● A number of Key Counties in Swing States voting by precinct prior to November 2024</li> </ul>
<p><i>Explorations &amp; Decisions</i></p>	<p>Surgical intervention in the most vulnerable areas was necessary to determine the best direction to advance with the project.</p> <p>Key counties in swing states must be the focus and prevention is key. Top preventative deterrant is the factor of granular auditability. This means being able to audit down to the smallest subdivision outlined by the legislature and local government, the VOTING PRECINCT.</p> <p>We have a federal lawsuit designed to sue the Secretaries of State for facilitating the issues found with countywide voting which cannot be</p>

rectified for elections past, and for the continued cover-up of the issue related to ballot secrecy in counties who report by precinct while voting countywide.

---

- **Project Scope:**

- Coverage throughout the 2024 Election Cycle and into the next Congressional Session.
- Focus on key legislative sessions in swing states.
- Offer diverse voter education methods emphasizing the importance of ballot secrecy and auditability.

## 4. Overhead Costs

- **Total Cost:**

- Estimated at approximately \$800,000 to launch TBTR Strategies including the entire team, including travel, office space, salary, etc., through the 2025 Legislative Session(s).
- Fee Schedule available for contract work.

## 5. Project Outcomes

---

<i>Project Outcomes</i>	<p>Turning out the vote in key states by educating voters and restoring trust in local elections.</p> <p>To encourage and guide county, state and federal representatives to adhere to constitutional election law as opposed to contradictory or unconstitutional guidance from NGOs or the Administrative Deep State.</p> <p>We offer citizen educational training and experienced guidance from our countless citizen investigators to any interested person, party or entity, regardless of political affiliation.</p> <p>We must restore trust and participation in our elections before we end up being ruled by an elite class of unelected administrators who do not answer to We, the People.</p>
-------------------------	--

---

## 6. Goals

- Secure Voting By Precinct in Key Counties in Swing States prior to November 2024
- Educate voters, representatives on key legislative issues and why we need to make certain changes to ensure fair elections for all.
- Offer courses, draft and lobby for legislation to be passed in the next legislative session.

## 7. Conclusion

Reiterate the project's commitment to ensuring ballot secrecy, educating voters, and supporting informed voting decisions among all lawfully voting citizens in the 2024 elections, regardless of political affiliation.

---

This outline provides a structured approach to presenting the critical issues and solutions related to ballot secrecy, the specifics and costs of the project, the expected outcomes, and insights from survey data, supported by relevant resources.
