

Ester Alcohol (C-12)

English Name: 2,2,4-Trimethyl-1,3-pentanediol monoisobutyrate

CAS number: 25265-77-4

Molecular Formula: C₁₂H₂₄O₃

Appearance: Colorless and transparent liquid

Item	Index
Color(Pt-Co), No.	≤10
Content, %	≥99
Acidity, %	≤0.05
Water content, %	≤0.1

Application:

1. C-12 is the premier coalescent for latex paints. It performs well in all types of latex paints, in a variety of weather conditions, and over substrates with different levels of porosity.
2. It is also an ideal choice as a retarder solvent for use in coil coatings and high-bake enamels. Its unique balance of properties also makes it useful for a variety of chemical.
3. specialty applications such as ore flotation / frothing, oil-drilling muds, wood preservative carriers, and floor polishes.

Packing: 200kg drums, IBC drums, ISO tank
