

SHANGHAI PEFTE
CHEMICAL TECHNOLOGY CO. LTD.

—TECHNICAL DATA SHEET—

快干锡 Quick-drying tin catalyst

Specifications:

Appearance: Colorless viscous liquid

Applications:

1. Quick-drying tin is used as a highly efficient catalyst in the manufacture of polyurethane foam, coating, adhesive and sealant.
2. Quick-drying tin is used in two-component polyurethane, polyester, nitrolacquer, printing ink, hardening catalyst, good oxidation.

Storage:

Store in a cool dry ventilated place. Light loading and unloading should be carried out. Avoid packing damage in transit. If damaged, should be sealed up immediately.

Packing:

25kg/Plastic drum, 200kg/drum.
