CHEMICAL TECHNOLOGY CO. LTD.

—TECHNICAL DATA SHEET—

马来酸单丁酯二丁基锡 Di-n-butyltin di (monobutyl maleate)

CAS No.: 66010-36-4

MF: C₂₄H₄₀O₈Sn

MW: 574.7

Physical property

Density: 1.26 g/cm³ at 20°C (lit.)

Refractive index: 1.493 n₂₀/D (lit.)

Viscosity: ≤ 500mPa.s

Freezing point: Approx 15-20°C

Specifications:

Appearance: Pale yellow transparent viscous liquid

Odor: Weak odor

Tin Content: 20%-21%

Character:

Di-n-butyltin di (monobutyl maleate) has good weather resistance, transparency, stain resistance and thermostability, can avoid sulfur pollution.

Applications:

Di-n-butyltin di (monobutyl maleate) is used for PVC transparent hard products.

Storage:

Keep in cool dry places.

Packing:

25kg/plastic drum, 50kg/drum
