

Care & Maintenance

REGULAR CARE

To clean, wipe with soft sponge or cloth moistened in warm soapy water, then dry. Regular cleaning of head rests, arms and seat cushions is important to remove body oils which can cause hardening of the surface.

SPECIFIC STAIN TREATMENTS

Prompt attention will yield better results. Liquid spills should be blotted with a soft dry cloth. Wipe stain from 'outside in' to avoid spreading. For other stains, use a small amount of mild detergent solution.

WARNING

- **Never use abrasive cleaners, steel wool or non-proprietary cleaners containing solvents.**
- **Avoid exposure to excessive heat and non colour fastness dye found in some articles of clothing as they may transfer to the fabric surface.**
- **Avoid excessive wetting and scratching of the fabric. This can cause damage and will void the warranty.**
