

WATER SLIDE SAFETY INSTRUCTIONS

Our Inflatables are designed with children's safety as the #1 priority. All Inflatables are cleaned and disinfected after each use. Each unit has a safety step entrance to prevent falling while entering or exiting the unit. The entrance is made with a small opening to prevent children from falling out while making it easy to exit in the event that unit ever deflates. All units have lots of net windows to allow adults to closely supervise the children. All units must be tied down at all anchor points by stakes or sand bags.

We reserve the right to cancel a reservation due to heavy rains or high winds (over 20 mph). There is no penalty to the renter. We will call you on the morning of your party to confirm your reservation in which at that time you have the option of canceling your order. Shall you decide to proceed with your order in such weather conditions, once the unit is delivered, there will be no refunds should the weather conditions consist of heavy rains or high winds.

A responsible adult must be assigned to supervise the children while the unit is in use. The adult must know all the safety rules and also be the enforcer of these rules. The renter is responsible for the safety of the children and the care of the equipment. REMEMBER: The operators are ultimately responsible for the majority of injuries that happen on Inflatable rides.

While the inflatable unit is in operation, the operators should watch the riders at all times. No roughhousing or horseplay should be tolerated. No climbing on the sides of the slide or nets is allowed. Anyone who does not obey the rules after being warned should be asked to exit the ride (operators should be made to understand that they are in control of the inflatable unit and removing someone from a inflatable unit who is not following rules is important for all riders' safety)

We recommend a maximum rider height of 6', and a maximum rider weight of 150lb. We also recommend that children younger than 5 years or less than 42" tall not use the Water Slide. When leading riders onto the Water Slide or Combo Unit, make sure that you group riders by size so that smaller riders are not intimidated by larger ones. The maximum number of people of each group that play at the time: 2 persons with max weight of 600lbs total:

1. Two (2) adult operators shall be on duty at all times the unit is being used.
Operators are needed to operate this device. at to assist riders the entrance and at the exit points.
1. Group children by size and age, do not allow a small child on at the same time as larger and more boisterous children
2. 2nd rider waits for the 1st rider to climb and slide down before starting the climb.
3. 2nd rider allowed to slide only after 1st rider exits the pool area.
4. Patrons are shall only ride feet first. They shall be instructed to sit down first before moving down the Water Slide. Riding head-first is dangerous and can lead to neck injuries. On no account allow any rider to jump or dive onto the Water Slide
5. Wearing of shoes is not allowed. Remove any hard or sharp objects, e.g. Pens, buckles, glasses, jewelry, baseball caps etc.
6. Do not allow children to deliberately collide with each other.
7. Do not allow a new batch of patrons onto the unit until the previous group has exited.
8. Waiting children should stand at least 3ft (1m) from the front of the unit
9. Do NOT move inflatable unit from the place it is originally installed.
10. Do NOT remove pool liner, stair liner or slide liner from the unit.
11. Do NOT remove the straps or any items from unit as it came.
12. Maximum wind speed for safe operation is 20 km/hr (15 mph). If wind speed gets higher assist the riders to exit the ride. Immediately stop the operation and deflate the unit. If the power fails, assist the children off the unit immediately and do not allow them to re-enter until power is restored and the unit fully inflated.

Inflatable unit's are reliable, but in case the inflatable unit begins to deflate follow this instructions:

If the unit becomes punctured or begins to lose air, assist all users from the unit and deflate it. If the unit becomes damaged while in operation, the procedure is as follows:

1. **Make your way to exit door.**
2. **The motor has stopped, in which case check the cord connection at the outlet near motor and remember to keep only 100 foot extension cord on the outlet. (Stronger outlets are in the kitchen and laundry rooms)**
3. **If the motor is continuing to run, check the air intake on motor for blockage and retie if necessary, check zippers at the sides or back of the inflatable unit and make sure they are closed.**

A responsible adults must be assigned to operate the unit and supervise the children while the unit is in use. The operators are responsible for the safety of the children and the care of the equipment.

We recommend a maximum rider height of 6', and a maximum rider weight of 150lb. We also recommend that children younger than 5 years or less then then 42" tall not use the water slide. The maximum number of people of each group that play at the time: 2 persons with max weight of 400lbs total:

Operator should assist riders at the entrance and at the exit points.

1. 2nd rider waits for the 1st rider to climb and slide down before starting the climb.
2. 2nd rider allowed to slide only after 1st rider exits the landing or pool area.

Rider should sit down at the top of the slide with their feet out in front and then push off going feet first only. Riding head-first is dangerous and can lead to neck injuries.

DO NOT Slide Head First!

NO Double Riding!

Exit the pool area after Sliding down

DO NOT jump or climb on the side walls!

Waiting children should stand at least 3ft (1m) from the front of the unit
