## Solar Rooftop

Solar energy is created via a photovoltaic system, where panels generate electricity through exposure to sunlight. This electricity is converted from DC (direct current) to AC (alternating current) power and supplied back to the power grid, or stored for later use.

# TRADING

Solar

**Reduce your  
ELECTRICITY  
costs upto  
50% with  
Solar Rooftop**

Solar rooftop installations are part of renewable energy solutions that can lower operating costs while at the same time contribute towards a greener environment.

By installing solar rooftop panels on domestic, industrial and commercial buildings, businesses can take advantage of larger surface areas to generate electricity from sunlight, supplying excess energy back to the power grid. Other buildings such as schools and hospitals, and those in the retail and service sectors with large roof space can also install solar rooftop panels for energy efficiency.

# T R A D I N G

Solar

Solar energy in India has the potential for significant growth. It is a key renewable green energy for development, supported by Indian government policies. The solar energy market has been opening up for private investment, operations and innovation, including recent solar rooftop regulations. This will promote private electricity generation and trading, especially in industrial and commercial buildings.

Electricity costs are rising every year. An average commercial consumer pays approximately INR 7-9 per unit of electricity. By installing a rooftop solar power plant, commercial users can reduce their electricity costs upto 50%. By using our solar rooftop EPC services, clients can convert the rooftops in their manufacturing plants, educational institutes, hospitals, warehouse, parking sheds, residential complexes into a captive power plant generating free electricity from the sun and save significantly on their electricity costs.

## Face Shield

COVID-19 Prevention: Face shield safer, more effective than masks against coronavirus, say experts.....

As coronavirus cases rise around the world and in the country, the use of face masks has become mandatory. Apart from medical professionals, even flight travellers are being given face shields to ensure their safety.

Experts are now suggesting that face shields may be a better method of prevention from novel coronavirus infection, as compared to face masks.

# T R A D I N G

Face Shield

**Experts suggest plastic face shields more effective in protecting against coronavirus spread.**

Many other countries, like Singapore, are also bringing in the use of face shields. When schools reopen, face shields will be provided to the students. In Pennsylvania, face shields have been recommended for teachers after schools reopen.

According to a group of experts, **Plastic Face Shields** may do a better job at protecting against COVID-19 than face masks.

Since domestic air travel was opened up for the general public in India, face shields are being given to passengers by various airlines, in order to ensure their safety.

## Hand Sanitizer

Asian Paints, India's leading paint company with the launch of the Viroprotek range of Hand and Surface Sanitizers,

When it comes to preventing the spread of infectious diseases like COVID-19, nothing beats good old-fashioned hand washing.

But if water and soap aren't available, your next best option, according to the Centers for Disease Control and Prevention (CDC), is to use an alcohol-based hand sanitizer that contains at least 60 percent alcohol.

**Stay protected wherever you are.**

Sanitizing hands frequently is a quick, more effective way to protect you and your family. Viroprotek 200 Hand Sanitizer and Disinfectant is gentle on hands so you can use it as often, anywhere and on the go.

**Use Viroprotek 200 Hand Sanitizer and Disinfectant when:**

- + You can't wash with soap and water
- + For added protection after washing and drying your hands

**asianpaints Viroprotek 200**

Rinse-free hand sanitizer  
Safe on skin  
Fortified with clove oil

Your family's safety is now in your hands

The fear of catching the infection has made us all habitual of washing our hands and using sanitizer often. Though yes, hand sanitizers seem to be an easy option to keep all the nasty bugs away.

\*CAUTION: DO NOT USE ON ELECTRICAL FITTINGS, LEATHER, FOOD ITEMS, PLANTS, HOT SURFACES OR NEAR ANY FLAME

## Sanitizer Tunnel

The disinfectant tunnel is a full-body disinfection chamber meant to decontaminate one personnel at a time. High-pressure nozzles spray the disinfectant fluid in the form of a fine mist filling the chamber. This fluid disrupts the protein structure of microorganisms on the surface, thus killing them eventually. The spraying continues for a set time of seven seconds. "Apart from the sensitive areas like our eyes and mouth, the rest of the body can be disinfected when you enter the tunnel.

The body gets exposed to a lot of germs, bacteria and viruses on transport or outdoor places especially amid the outbreak of such a life-threatening disease.
