Homecare: Resin Fillings

Now that we've placed your resin filling, it's important to follow these recommendations to ensure its success.

Chewing and Eating:

If we used an anesthetic during the procedure, avoid chewing until the numbness has worn off completely.

To prevent staining your resin fillings, avoid foods and drinks that can discolor teeth such as berries, chocolate, coffee, tea, cola and red wine.

Brushing and Flossing:

Brush and floss normally.

If your teeth are sensitive to hot, cold or pressure, use a desensitizing toothpaste. If sensitivity persists beyond a few days, call us.

Discomfort:

To reduce any discomfort or swelling, rinse your mouth three times a day with warm salt water. Use about one teaspoon of salt per glass of warm water. It's normal for your gums to be sore for several days.

When to Call Us:

Call our office if your bite feels uneven or if you have any questions or concerns.
