

Welcome

to a Great Year of Preschool!

This year your child will benefit from a professionally developed preschool curriculum designed by Mother Goose Time. This comprehensive curriculum nurtures the whole child and supports social, physical and cognitive development. Your child will build foundational skills in early literacy, math, music, art, social studies and science.

Hands-On Learning

Children will love learning as they create art, sing, dance, read books and explore the world around them. Mother Goose Time Curriculum presents many creative and hands-on experiences for children to explore each day. Throughout the process, they will ask questions, problem solve and discover a joy for learning.

Family Involvement

We help you stay connected to your child's learning by sending home many projects created by your child including art, mini-books, games and little journals. Through these interactive projects, children learn letters, numbers, shapes and fun facts about the monthly focus theme.

Each month you will also receive a family newsletter highlighting the theme of the month. You will get tips for talking to your child about the topics he is learning. Also included are song lyrics, fingerplays and other fun activities you can share with your child at home.

Curious, Creative & Ready for Kindergarten

Mother Goose Time Curriculum allows your child's teacher the ability to customize lessons to your child's skill level and learning style. The result is a safe environment where your child can confidently try new tasks and increase his innate sense of curiosity. All daily lessons and activities are intentionally designed to help your child gain proficiency in the skills needed to support lifelong success in learning. To better understand the skills your child will work on, visit the Mother Goose Time website and read the Skills and Standards.

Did You Know?

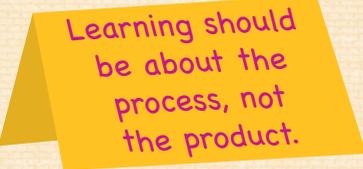

Children learn through hands-on experiences.

Teachable moments happen many times throughout the day. We strive to help the teacher recognize those moments and utilize them.

Preschool is the prime opportunity to develop social skills.

Learning should be about the process, not the product.

Creating a safe, nurturing learning environment promotes learning.

Asking open-ended questions facilitates the development of critical-thinking skills.

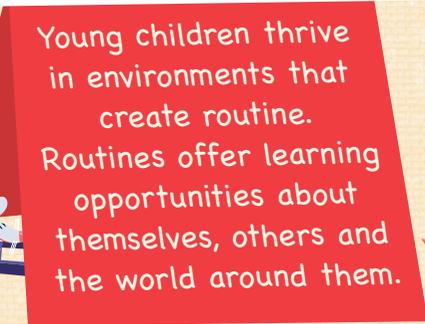

Children develop at varying rates and times.

Activities should focus on the whole child and help the child develop socially, emotionally, physically and intellectually.

Children learn through play.

Young children thrive in environments that create routine. Routines offer learning opportunities about themselves, others and the world around them.
