

TOOLS THAT
INSPIRE PROBLEM SOLVING

TOOLS THAT NURTURE A
LOVE OF LEARNING

TOOLS THAT
SUPPORT DEVELOPMENT

TOOLS TO
EXPAND CURIOSITY

Your child is about to begin an exciting learning journey!

Mother Goose Time is comprehensive, research-based preschool curriculum designed to support and nurture your child's development across all areas of development, including social-emotional, physical, language, cognitive, and creative. Every month, your child will investigate a new theme through games, storytelling, art and music.

A Daily Routine designed for hands-on learning

A typical day of hands-on investigation will include:

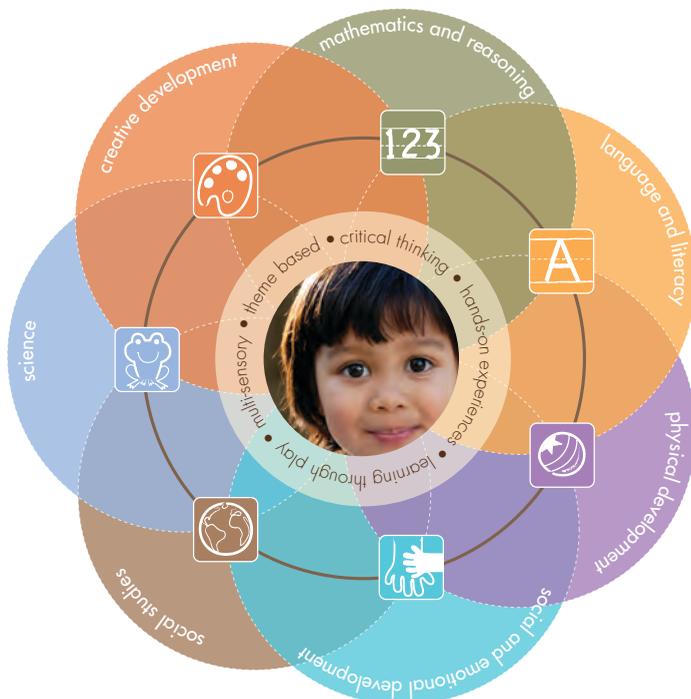

BIG QUESTION OF THE DAY: Each day your child will be prompted with a question that introduces him to the day's topic. Great dinner conversation!

CIRCLE TIME: We'll build friendship skills through songs and rhymes. Your child will also get to be a special helper. Ask your child how he helped today.

SMALL GROUP ACTIVITIES: Learn phonics, counting, problem-solving and emergent writing skills through educational games and projects.

STEAM STATIONS: Your child will have many choices throughout the day for independent learning. By visiting one of the Art, Science or Math centers, your child can experiment with his creative ideas, investigate nature materials or solve an engineering challenge while building with blocks.

MUSIC AND MOVEMENT: We end every day with a celebration of learning. Your child builds coordination and balance by participating in a movement program designed by a dance and early childhood specialist.
