|  | PR Live plant. Zebra Plant (Medium) A lovely, striking plant for the dry or scrub terrarium. Tolerant of a wide variety of moisture and light conditions the only things this species really doesn't like is very low light and a wet soil. It will tolerate drying out as it stores water in its leaves and roots so its great for direct planting into a dry or scrub terrarium as the soil does not have to be kept damp. |  | PR Live plant. Mexican Firecracker (Medium) Code <u>PPL016M</u> | £5.49 |
|  | PR Live plant. Aloe Vera (Large) <p>Aloes are great plants for arid terrariums. Their interesting leaf shapes and growth habits make them ideal for adding interest to a planting arrangement. The leaves are often armed with spines so care should be taken when using them with larger species of animals. Aloes need bright lighting and a well drained soil which prevents the roots rotting. Their leaves are designed to store water and so they are tolerant of occasional drying out, but this should be avoided if possible. They prefer to be watered as the soil dries out, but before they are completely dry. Unless the terrarium is set up with a deep, bio-active substrate then plants is a dry terrarium are best kept in their pot, which is then disguised with substrate and decor. This allows the plants to be watered as necessary without making the whole substrate too damp.</p> Code <u>PPL001L</u> | £8.99 |

|---|--|---------------|
|  | <p>PR Live plant. Inch Plant 'Variegated' (Large)</p> <p>Commonly called Moses in the Cradle plant this is one of the prettiest plants that can be grown in the terrarium. It needs bright light to maintain its colour and high humidity. The soil needs to be evenly damp and well drained so that the roots are not permanently wet. Occasional drying out will be tolerated but should be avoided if possible. This is quite a tall plant, reaching up to 30cm, and over time it forms large clumps from shots growing from the base but it is so attractive that it makes a fantastic focal point. care should be taken when using this plant in terrariums with large or herbivorous animals as the sap is an irritant and can be toxic if eaten in large quantities.</p> | £8.99 |
