To Vita Products

I would like to take the time to inform you how much I like your Christmas Tree and Wreath Preservative Product. I have used it at our company for many years. It really helps keep the wreaths and fresh decorations we sell fresh longer.

A couple of years ago I took a small bottle home with me to try out on my personal Christmas tree. I decided to see how long the product would last. So I filled the stand with water and the recommended amount of Vita together and waited to see the results. My husband always wants me to leave our tree up until after New Years because of being in the Christmas industry we really don't get to enjoy our tree until all of our customers orders are filled.

New Years came and the tree was still looking real good. Then I decided to see if it would last until my birthday. People coming to visit would come in our house and see the tree and say "Don't you know Christmas is over? Then I told visitors that I was leaving it up until my birthday! My birthday is February 10th. They all just said OK? I was getting tired of the tree but it still looked pretty good for being in a warm house. It did start to show some signs of drying but not like I expected. I always use Vita in my tree stand now and we sell it to customers at the tree lots.

Sincerely

  
Sue Turnbull
