**Subject:** Your great products

Kay, Thank-you for your fast response. I suspected the greying on the bucket was some kind of reaction to the two different solutions. Thanks for clearing the matter for me. I'm actually grateful that it happened. One more time evidence of toxic chemicals becomes clear that its use is wide spread. Scarey! It's good to get a reality check once in a while. I plan to do blood work to test for chemical build up since using Floralife products. I went to your website and was excited to see all the products you have. I'm interested in all of the floral sprays and fertilizer solutions. I currently buy from Gardens Alive, Peaceful Valley, and Territory Ahead. They are not Wholesale but have a good product selection. I do some Christmas pieces starting in middle November, some specific info. on those products would be great. I can not tell how glad I am to have found you and your products. Friday was the first full day of using the Vita One Step and it just made me feel better. I wasn't using something was that was harmful to me, my help, or my be-loved farm. And on top of all of that, IT WORKS. I had so many flowers at the market I could not keep them all under shade and the sun did not bother them. Thank-you for that. I will be calling Monday morning to order a case of gallon Vita One Step. Again I thank-you for having the consciousness and for sight to create the products you have. I give you my respect, Barbara Engelsen.
