Subject: Vita Derma - anti bacterial lotion

To Whom It May Concern: I have just received a bottle of this lotion in with my regular order for Vita Care for my flowers. I have only used it for a few days after Mother's Day and can already tell a difference in my fingers --- it is amazing!!! I have SUFFERED with this horrible stuff on my hands for almost 5 years --- have been to 4 different dermatologists , each giving me a different steroid cream, steroid shots in my fingers and telling me to use super glue to stick my open breaks on my fingers back together, blood and all. My fingers have not felt this good in so long I can't remember when. Please write me back and tell me how to order some of this wonderful lotion for others that work in my flower shop (I split the bottle with another lady that works for me who suffers with the same stuff) --- need to keep it on hand at all times..... all I can say is THANK YOU, THANK YOU, THANK YOU!!!! They are not completely well yet, but are on their way.
