

June 30, 1991

Dear Kay,

While shopping at Mountain Aire Nursery, I was given a one ounce sample of Vita Planta with the instructions to mix with one gallon of water and try it on my plants. I used it and pretty much forgot about it. About two weeks later, my plants really caught my eye. They were so lush and healthy that I had to stop and look at them. The color of the leaves was a rich blackish green, and the new growth was amazing.

I went back to Mountain Aire Nursery and bought some Vita Planta. I've used it on plants inside and outside as well. The bloomers outside have abundant flowers; the foliage plant inside and outside are absolutely striking.

I've never seen anything work like Vita Planta. I've used

Miracle Grow, Job's and several  
"fly-by nights". Nothing has given  
the results I've gotten with  
Vita Planta. Thank you for this  
product!

Sincerely,

Ana Horvath
