SEPTEMBER 5, 1991

Mr. Bill Ruth

Working for the Town of Snowflake, we had purchased a product from you called "Vita-Planta". We had transplanted 95 Pine Trees to our new industrial park. Soon after words alot of the trees started looking very bad. By the time we were able to apply your product we had already lost 7 trees. Using your recommended dosage on the remaining trees (3 were too far gone to help) all the rest survived and are doing fine... I also used it on the lawn at the Waste Water Treatment Plant but discontinued use because I couldn't keep up with cutting the grass and maintainmy other duties.

The other quantity of Vita Planta you gave me for home use ,worked expecially well with my wife's potted plants... She noted the soil seemed to be more absorbent, holding the water much better. Spritzing the leaves with the solution really made the leaves greener, more supple, and healthy looking. In our garden the tomatoes came out a beautiful color red and there were very few with any type of bug damage..

I used it with the 3 new fruit trees we planted this spring and they are just flurishing.

Thanks for this great product
