To : Mountain Air Nursery

Bill,

Thanks for your advise concerning our lawn here at Ponderosa Park Apts.

As you know, last year (our first) our lawn didn't look healthy at all. We had very hard ground where grass just could not grow. My supervisor suggested that this year maybe I should rent an aerator so that the sprinkler water could penetrate the rocklike ground. Before doing this I consulted with you as you are an expert on lawn care, sprinkler systems, etc. You suggested that I get a product called "Vita Planta" which you have at the nursery, and apply it to all problem areas.

I really didn't think that this would work, the ground seemed so hard, but I followed your advise.

Well I'm very happy to report that "Vita Planta" softened up those spots and now the grass is growing very well in all areas of our lawn. Hardly a day goes by that I don't get compliments on the lawn. The owner has

given me a raise for a job well done!

Bill, I can't take all the credit because if it wasn't for your advise and "Vita Planta" my lawn would look just like it did last year. I can't thank you enough for educating me on lawn care and this product called "Vita Planta". You've got our business forever.

Thanks again
