

Dear Bill

1-6-92

I was really pleased with the product ME-232, I have been using it everyrite on my leg.

I have an artificial leg from below the knee and from being on my feet all day it leaves a lot of sores and leaves the skin raw and irritated.

I just take a cotton ball and soak the sores let the air get to it and by the next day it's healed.

I never knew something like that would work on any sore. Janie introduced me to it and I have her to thank I would recommend it to anyone I think they would be just as pleased

as I am thank you and keep up the good work!
