TEF Silver — Teaching Excellence Framework

UK K9 — Training for Excellence

National Association of NASDU Specialist Dog Users

This course introduces the basic skills, knowledge and understanding required of a search dog handler to ensure the provision of a professional level of service.

You will have the opportunity to complete practical work as part of a simulated search dog handling team and the module is designed to help prepare and direct you towards the training required for a career in this area.

What you will study

During this course, you will study the following areas:

- Introduction to Handler & Dog Qualities
- Principles of Search Training
- Search Methods & Management
- Recording & Documentation
- Specialist Security & Detection Dogs
- Training and Career Planning

This course will be delivered in collaboration with UK-K9 Training for Excellence and is endorsed by the National Association of Specialist Dog Users
