

JUNE NEWSLETTER 2022

Greeting CMSA-OK Members and Colleagues,

Well, we did it! We survived our first education conference following a two-year hiatus and we were very pleased with the results. The board of directors would like to extend a heartfelt thank you to everyone who participated at every level. Our first thank you has to go to our Executive Director, Wendy Gerdes. Without her hard work, this conference would not have been as successful as it was. Another thank you to our sponsors, vendors and business partners. 8 generous sponsors and 54 wonderful exhibitors blessed us with their participation. We sold out of exhibit space and were able to make room for a few more. Without the support of these businesses, CMSA-OK would have a much different look. We are grateful to work with such loyal businesses. We are thankful for our wonderful speaker panel. All of our guest speakers volunteered their time and we hope you found their messages beneficial and informative. We are so thankful for our attendees and we are so proud that we are able to offer you the CEU's that you need to maintain your licenses. Lastly, I would like to thank my fellow officers and Board of Directors. I know we ask a lot and you show up and provide every single time with a smile on your faces. Every person that I have mentioned contribute something to CMSA-OK, and because of you, we are a better organization.

I would like to give special recognition to Taylor Physical Therapy for winning our best exhibitor award. The Board of directors chose the best exhibit space and the winner received a free exhibit space at our next conference.

We have many exciting events scheduled for the rest of the year. Our Membership Meeting and New Member Drive will take place at Hefner Grill on June 16, 2022. Our total membership took a significant hit during COVID, but we are very pleased to see our membership numbers rebounding. Please consider bringing a friend or colleague who is not a member of CMSA-OK and we will help you encourage their participation and membership.

case management society of america • oklahoma

We are very excited to announce that David Chansolme, MD will be our guest speaker that evening. Dr. Chansolme has been a strong supporter of our organization for many years. He will be speaking about infectious disease following COVID. Seating for this special event is limited, so please look at our website for further details and provide us with your RSVP before it is too late.

We will also be hosting an August Education Luncheon as well as our Annual 2-day education conference and ethics panel in November. This year's theme will be "The Jurassic World of Case Management" Survival Guide. Additional information regarding sponsorships, exhibitors and attendance will be forth coming.

We look forward to seeing all of our members and supporters at our upcoming events. If you have any questions, concerns or ideas for the organization, please do not hesitate to contact any of the board members or myself. As a board, we are here to serve you, our members and your input for the direction of your organization is vital to the future success of CMSA-OK.

With all good wishes,

Robert Fuxa

Dear CMSA-OK Members,

It has been a fun filled 6 months of 2022! The CMSA-OK April Conference was fantastic! We sold out of booths twice, if we had more room there would have been more exhibitors. We all wanted to be back in person, meeting people, learning about products and services and hearing terrific speakers. The conference was well attended with many new faces and of course seeing our members there was awesome. Thank you so much to those who could make it. We understand the time to get away from your job can be difficult.

Now hopefully you can make the June 16th Membership Event, an evening with Dr Chansolme is exciting! He will be discussing **“Covid-19 in 2022: Retrospective and a Look Forward”** and its FREE for members. We only have seating for 57 so you better register asap.

We are also planning an August Luncheon with Nancy Skinner, RN, CCM, CMGT-RN, ACM-RN, CMCN, FCM, she has developed a presentation on treating patients with **Hepatic Encephalopathy for Case Managers**. Nancy has been a President of CMSA twice and this is a great opportunity to have her here. Bausch Health is sponsoring this luncheon. We are planning on Thursday August 18th, location to be determined. Lunch seminars are FREE for CMSA-OK Members, another benefit working for you.

CMSA-OK is thrilled to be back in person, planning and working on events for our membership. **“Jurassic World of Case Management- Survival Guide”** will be November 15th and 16th 2022. The November Conference will be at the Embassy Suites Medical Center in OKC We have been here many times and look forward to another great conference. Tuesday will be the Ethics Workshop with 3 sessions and then all-day education on Wednesday. We received many topics from the April Conference survey to decide from. If you have a topic, please send in to us. CMSA-OK is here working for YOU. So, make sure you plan ahead to attend, CMSA-OK Members receive a discount to attend the conference.

We hope you have checked out our social media sites, CMSA-OK has a Facebook page and we are on LinkedIn. Please like and follow our pages for updates. Also, we have a Blog page on the website, this is where you can check out our business members information, services and other interesting information as a resource.

We hope to see you all soon and thank you for your continued time and support. Please reach out to us for any information or questions you have. CMSA-OK is working for you and we would be thrilled to hear from you.

Wendy Gerdes – Executive Director

405-406-1933

Thank you to our April Conference Sponsors!

New Business Partner!

Oklahoma ABLE Tech, housed at Oklahoma State University in Stillwater, OK, is a federally funded program that assists Oklahomans in learning, exploring, accessing, and acquiring assistive technology (AT) and other enabling devices to gain and maintain independence. Services are provided to all Oklahomans across the state of all ages, and focus on all environments that AT or other enabling devices may assist individuals - including work, school, community, and home.

Two of ABLE Tech's core programs allow individuals to gain access to needed AT through exploring and trialing devices of potential need. This is as simple as receiving 1) a device demonstration – learning how a device works to determine if it is going to assist the user; 2) a short-term device loan – borrowing a device at no cost to use in a customary environment. Both of these activities help individuals make more informed decisions before acquiring needed AT.

To dive deeper into the technology services provided by ABLE Tech, device demonstrations give individuals the opportunity to compare the features and benefits of a particular AT device. An individual can see, touch, and try multiple devices to help in the decision-making process. ABLE Tech partners with agencies statewide to provide 12 demonstration centers: The Alzheimer's Association Tulsa Chapter, Handicapped Vehicle Services, two Area Agencies on Aging – INCOG and KEDDO, Moore Autism Center, Newby Vance Mobility Sales and Service in Guthrie, NewView OKC and Tulsa locations, OSU-Speech-Language-Hearing Clinic, Pathways Therapy Center, SoonerStart, Speech Pathway, The Bethany Children's Health Center, and United Access Mobility Auto Sales.

The Device Short-Term Loan Program provides Oklahomans the opportunity to borrow needed AT devices for up to six weeks to try before purchasing. The program is free and easy to use. Devices are shipped statewide with a return label included. ABLE Tech maintains an inventory of over 3,500 devices for individuals to trial in their home, work, or community environment: anything from smart home technology, robotic pets, iPads with apps, magnifiers, TV sound amplifiers, devices with video chats, computers, and much, much more.

For individuals looking for permanent solutions, ABLE Tech offers two programs for acquiring AT - Financial Loans and Device Reutilization.

The Financial Loan Program is available to help individuals purchase any needed AT or durable medical equipment. This includes vision/hearing/communication devices, mobility devices, daily living aids, lift chairs, home modifications such as ramps or walk-in bathtubs, and smart home technology. This program is a 5% interest rate loan with flexible lending criteria that can be repaid over a 3- to 84-month term depending on the item purchased. The program also offers a microloan program for purchases under \$2,000 that has additional credit flexibility for applicants and can be repaid over a 36-month term.

The Device Reutilization Program collects donated, gently-used equipment that is cleaned, sanitized, and then reassigned to other Oklahomans in need. Equipment includes items such as bath benches, blood pressure monitors, commodes, CPAPs/BiPAPs, gait trainers, hospital beds, knee walkers, nebulizers, patient lifts, quad canes, scooters, shower chairs, standers, walkers, and manual and power wheelchairs. ABLE Tech is proud to collaborate with Oklahoma Healthcare Authority to provide the Device Reuse Program. While this, and all programs offered by ABLE Tech serve all individuals across the state, the reuse program gives first priority to SoonerCare participants. This program also hosts a Device Exchange website where people can find, sell, or donate needed AT or other medical equipment

Want to learn more? ABLE Tech has a team of staff available to talk through needs, ideas, and solutions. Staff includes an AT Specialist, hearing AT specialist, Occupational Therapy Assistant, Speech Pathologist, and a low vision specialist. Staff will provide consultations, public training, and other educational opportunities for free. The team is readily available to assist. To learn more about these programs call 1-800-257-1705, go to the website at www.okabletech.org, or connect with us on Facebook.

Mac Moore, MD

ORTHOPEDIC SURGEON

If you're struggling with knee or shoulder dysfunction or pain, Dr. Mac Moore at the Oklahoma Shoulder and Knee Institute should be your next phone call.

Moore is a fellowship trained and board certified orthopedic surgeon in Oklahoma City specializing in the diagnosis and treatment for traumatic, non-traumatic, workplace and sports-related orthopedic injuries to the shoulder, elbow, hip, knee and lower extremities.

Utilizing the latest minimally-invasive surgical techniques, Moore provides each patient with a continuum of care from the very first appointment to rehabilitation.

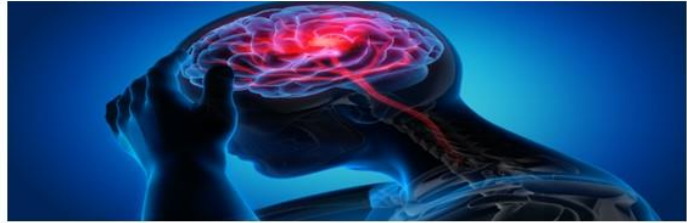

Moore is caring, compassionate and committed to getting each patient the best result possible. Patients describe him as down-to-earth and highly skilled in orthopedic surgery and sports medicine.

"I want my patients to return to a healthy, happy, active lifestyle," he said.

For those considering orthopedic surgery, Moore said it's important to trust your surgeon and work hard in physical therapy. But, with advancements in cutting-edge arthroscopic and minimally invasive techniques for shoulder and knee surgery, Moore said patients can trust, in the end, that their shoulder or knee will be drastically better than before surgery.

Moore attended medical school at Louisiana State University and completed his orthopedic surgery residency at OU Health Sciences Center, as well as a shoulder and sports medicine fellowship at the University of Arizona. He is a member of the Arthroscopy Association of North America.

Save a Life Be Stroke Aware

What is a stroke? A stroke, sometimes called a brain attack, occurs when something blocks the blood supply to part of the brain or when a blood vessel in the brain bursts. In either case, parts of the brain become damaged or die. A stroke can cause lasting brain damage, long-term disability, or even death.

What are the types of stroke?

- **Ischemic Stroke:** Most strokes (87%) are ischemic strokes. An ischemic stroke happens when blood flow through the artery that supplies oxygen-rich blood to the brain becomes blocked. Blood clots often cause the blockages that lead to ischemic strokes.
- **Hemorrhagic Stroke:** A hemorrhagic stroke happens when an artery in the brain leaks blood or ruptures (breaks open). The leaked blood puts too much pressure on brain cells, which damages them. High blood pressure and aneurysms – balloon-like bulges in an artery that can stretch and burst – are examples of conditions that can cause a hemorrhagic stroke.
- **Transient Ischemic Attack (TIA):** A TIA is sometimes called a “mini-stroke.” It is different from the major types of stroke because blood flow to the brain is blocked for only a short time—usually no more than 5 minutes.

What are stroke signs and symptoms?

During a stroke, every minute counts! Fast treatment can lessen the brain damage that strokes can cause. Remember BE FAST to recognize signs of stroke. If you think someone may be having a stroke, do the following simple test:

B E F A S T

Balance

Does the person have a sudden loss of balance?

Eyes

Has the person lost vision in one or both eyes?

Face

Does the person's face look uneven?

Arms

Is one arm weak or numb?

Speech

Is the person's speech slurred? Does the person have trouble speaking or seem confused?

SENIOR **Helpers** LIFE PROFILE

BETTER ASSESSMENT. BETTER CARE PLAN. BETTER OUTCOME.

Senior Helpers is the only in-home care company combining technology with compassionate care to develop the most accurate, thorough, and comprehensive care plan available.

Based on over 20 years of research into the most common reasons seniors experience falls, injuries, and rehospitalizations, our LIFE Profile™ assessment is a crucial tool in helping loved ones age safely and successfully at home.

Life Profile Assessment Areas:

- **Independence**
Ability to perform daily activities
- **Burden of Care**
Access to resources from family, caregivers, and the community
- **Safety Risks**
Assessing areas of concern around the home
- **Quality of Life**
Enjoyment of social interaction and leisure activities
- **Medical Condition Management**
Monitoring medical conditions and medication

Combined with our proven in-home care programs such as **Staying Home Safe™** (post-acute or post-rehab recovery care specifically designed to help prevent readmission), industry-leading Alzheimer's, dementia, and Parkinson's care, and trained caregivers, Senior Helpers LIFE Profile™ is leading the way to better outcomes for our clients.

Please call **405.608.4339** to learn more or how your patients can receive a complimentary, no-obligation consultation.

TAYLOR **PHYSICAL THERAPY**

Taylor Physical Therapy is a new outpatient physical therapy practice in Oklahoma City owned by Kevin Taylor. Kevin, however, isn't new to the business at all. He and his late business partner, Terrance Cason, started Human Performance Centers in 1998 and expanded to 10 clinics before selling the business in 2017. Kevin has over 25 years of experience treating all kinds of orthopedic and neurological conditions.

Taylor Physical Therapy focuses on promoting and preserving the health and well-being of patients with outpatient physical therapy for injured workers across the state of Oklahoma. They personalize work-specific training programs, and each worker receives the same physical therapist for each visit. In addition, they receive manual therapy, individualized job description performance training, and injury prevention. TPT's main objective is yours: to get your workers back to work by providing the best care to injured workers of all ages and abilities, and for them to actively be engaged in their comeback story.

"We promote and preserve the health and well-being of your workers by providing compassionate and comprehensive rehabilitation services delivered with a strong commitment to encourage your worker's efforts to improve. The highest level of clinical care is the standard at TPT, while maintaining individualized attention." - Kevin Taylor.

TPT is currently re-building their original vision while bringing the same unique qualities that Human Performance Centers was known for.

"We look forward to carrying on what we started years ago - 'Uniting Hands-on Therapies with Personalized Care', helping you function pain free, regain your independence, and ultimately, perform at a higher level. Let us help you create your comeback story!" - Kevin Taylor
