

Israel is at war!

The threats on all fronts are now tangible, stronger, and clearer than they have ever been before.

At Bnai Zion Government Medical Center, we have transitioned to an emergency hospital. We are committed to making the optimal operation of our secure and protected facilities.

Our fortified Emergency Department and Hospitalization complex, designed to withstand missile and chemical threats, commenced operations on October 9th, on unfortunate timing, but as a crucial asset. Its purpose is to serve the residents of Haifa and the Northern region

both during periods of peace and emergencies. Spanning 3500 sq. meters across two floors, it houses a secure emergency department and hospitalization facility dedicated to delivering state of the art medical care to all those in need.

While we proudly maintain the most secure facility in the region, we currently face a shortage of permanent medical equipment for our protected hospitalization department.

Acquiring this equipment would eliminate the necessity of relocating resources from various departments during sirens and under missiles attack.

The essential medical equipment we require at this time encompasses:

Equipment	Price Per Unit	Amount Required	Total
Electric bed	3,000 \$	100 84	300,000 \$
Mobile computer cart	3410 \$	20	68,200 \$
Fluid warmer & supplier under pressure	19,500 \$	1	19,500 \$
Patient's bed monitor	15,200 \$	30	456,000 \$
Defibrillator	11,500 \$	2	23,000 \$
LEVEL 1 under pressure blood device	4,000 \$	5	20,000 \$
Wheelchair	210 \$	130	27,300 \$
Diatreme	12,000\$	2	24,000 \$
Ultrasound Device	36,000 \$	3	108,000 \$
ECG	4,300 \$	10	43,000 \$
Ventilator	13,500 \$	4	54,000 \$
Anesthesia Machine	71,000 \$	4 3	284,000 \$

These are critical days for the people of Israel and the residents of the north. Given the ongoing war, your support and assistance at this time are immensely valuable and greatly appreciated.

May we be blessed with peaceful and secure days, and may our nation remain protected.
