

Data Upload Tab - Yield Data

The Data Upload Tab allows users to easily input GIS data, soil data, yield data, etc.

1. Select the **Data Upload** tab. The following page will display.

- A. Drag in a field that needs yield uploaded.

Data Upload Tab – Yield continued...

B. Under the Upload Type, click on the **Yield** option.

- Note the **Harvest Detail** options.

Upload Type

Sample Yield Boundary

Veris Imagery As Applied

Boundary and Sample Boundary (Agvance) Sample (Agvance)

Harvest Details

Crop: *Option to use drop down and select the crop yield being uploaded*

Use crop from file (if available) *Click this to pull crop from file*

Harvest Date: *Use drop down and select yield harvest date*

Use harvest date from file (if available) *Option to use date tied to the yield data*

Import Config: *Use drop down and select Import Config (for this exercise use SMS Advanced TXT)*

File: No file chosen

Auto Associate

E-mail batch upload results to:

C. With all parameters chosen, go back and click on **Choose File**.

Import Config:

File: No file chosen

D. Browse to where a zipped folder with shape files for a boundary / points / data reside.

- Click on the zipped folder, then select **Open**.

- The zipped folder will show in the Choose File window.

File: HC12011.txt

Data Upload Tab – Yield continued...

E. With everything set, go to the bottom left of the page and click on **Upload**.

- A **Loading Data** status indicator will appear briefly (right).
- A **Success** indicator will appear stating the Import was sent to the File Manager (below).

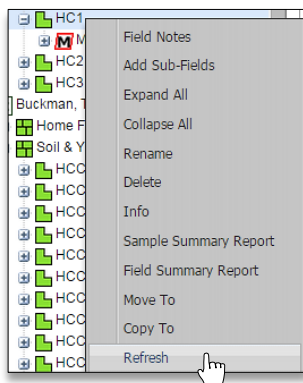

F. After a brief period, **Success** notification will appear showing the upload completed successfully.

G. After a brief refresh of the data, the field will now show the imported yield data.

Note: If the uploaded data does not display automatically, right click on the field and select **Refresh**. This will display the newly uploaded data.

H. Repeat the upload process for any other field / yield data.

2. **Starting Over.** If you are finished with exporting for a given session and want to upload new data, simply select the **Remove All** or **Remove Selected** buttons to clear the entries. You can then drag new profiles to the Account window to start a new upload session.
