

Adding Growers from Location Level

1. **Adding Growers (customers):** This option allows the user to add a Grower (customer) to a Location.

A. Right click on a desired Location. The following menu will be displayed.

B. Using the mouse, click on the **Add Customers** selection. The following window will appear.

C. Type in the name of the Grower (customer).

Note: Users can add more than one grower by clicking the **New Item** button. Every click will produce another naming window. Add as many growers as needed (limit 10).

D. Select **Save**. A Creating new profiles indicator will appear briefly.

E. The new grower will show up under the Location heading. Users will then need to populate the new grower(s) with farms-fields.
