

Help Document / Training Tutorial

Advanced Zones Tab - Advanced Rx - Creating Controller Files

1. Creating Controller Files.

A. Whether working on a new application or pulling up a saved application, review the parameters and confirm the application is ready to be made into a spread / controller file. Make sure to choose the controller type.

- **B.** I.F.A.R.M. provides the option to include the prescription PDF report with the generated spread files. If the PDF is required, make sure Include PDF is selected. It is active by default.
- C. If everything looks in order, click on the Initiate Export button. A Reminder indicator will appear. Click Proceed. After a few seconds a Success notification will appear stating the Controller file sent to the Field Manager.

Success	×
Controller file sent to File Manager.	
_	
Close	

D. After a short period, a **Download Application** prompt will display. To download the controller files to your computer, click the blue **Download** link.

Advanced Zones - Advanced Rx Tab...

D. Depending on which browser is being used, a download page will open, prompting the user to choose where to save the zipped folder with the controller files.

2. Moving the Controller Files.

- A. Double-click on the zipped folder to see the file components.
 - Note the difference between files with and without the PDF report included.

With PDF report

B. Users have several options to move / copy the files to other locations:

Farm_Farm_H	ome_Pota.prj	PRJ File
Open	ota.shp	SHP File
Cut Copy	ota.shx	SHX File
Delete V		
Properties		

Select all files, right click - copy and go to the other location and right click - paste.
