Field Summary Report:

- Record all products / decisions made per field. Select current and previous crops.
- Make field plans; save up to five years of plans in advance.
- Record hybrids, fertilizer events, tillage practices, pesticide events, cover crops, growth stages.
- Includes areas for EPA information and applicator certification identification.
- Record costs, product specifics, dates applied, acres applied.
- Write in notes for every entry topic.
- Save to profile tree and update as events happen in field. Save as many summaries as needed.
- Print PDF reports. Simple, concise report.
- Bring up data layer for front page (ex. Yield).
- Save setups and applications for standardized templates / reporting.
- Great for farm management records.
