

Target Samples:

This Module allows customers to create and set sample point locations by three different methods:

- **Manual:** Choose a field and set points randomly or use multiple layers as a guide (i.e. soil type, yield, zones, imagery, as-applied, etc.).
- **Grid:** Choose a field and use the grid tool box to establish and position desired grid:
 - 2.5 ac - 3.3 ac
 - 4.4 ac - 5.0 ac
 - 6.6 ac - 10.0 ac
- **New From Old:** Choose a field and view existing soil sample points and edit as needed.

Point Tools:

- Quickly set, add points, remove points, drag or renumber points.

Saving / Using Target Points:

- Save Target Samples to profile tree.
- Rename the file as required.
- Export via shape or GPL file types.
- Print out a target sample report.
- Use target samples in work orders for soil testing.
