

LINKING COMMUNITIES IN THE YUKON-KUSKOKWIM DELTA REGION

We are helping to link Tribes, Industry, Educational Institutions, Alaska State and Economic Development Organizations to supercharge technology innovation and improve the economic ecosystem that is essential to creating jobs, access to broadband, and access to education and training to participate in the digital economy.

DESIGN &
PLANNING

The YKD Tribal Broadband Consortium has over three decades of in-the-field broadband and technology experience. Our suite of services touches everything the internet impacts – and through our work we seek to create sustainable plans for what's next while supporting tribes, families, and

communities. Let us help you invest and build your community in Alaska.

We can help you implement projects using the IIJA, DEA and BEAD funding to boost Alaska's digital access and economy in the YKD.
