cloudprintingsolutionsltd.com

Enable field service & facilities management engineers with mobile label printing capabilities to create and apply asset labels on demand.

Avoid printing labels back at the office and posting them to engineers on the road who have to revisit site to label assets, often resulting in increased management costs & waste materials from overprints.

Deploy label printing solutions instantly to remote engineers via the internet with instant access to the latest product information and label templates.

Zebra Z-Ultimate 3000T Silver Labels provide extreme chemical and solvent resistance when matched with the Zebra 5095 resin ribbon

Outstanding print quality, smear and scratch resistance. Good resistance to moderate and harsh chemicals and solvents. Excellent adhesion to a wide range of surfaces. Tear and water resistant. UL approved for electronic equipment, as a label which will last as long as the product.

Applications

- Capital asset labelling and tracking
- Rating plate labelling and component labelling
- Shelf or scan-pallet labels
- Water-immersed labels or labels which are continually scanned
