- Fill Card Out on Next Tee while Others in Your Group Hit
- Place an "X" in Woods and Irons Section to Indicate Clubs Hit on Each Hole
- Circle any "X" to Indicate any Unsolid Feeling Hit, Regardless of the Result
- Square Any "X" to Indicate a Chip Shot
- Circle Appropriate Letters and/or Numbers in Fairway, Green, Bunker & Putts Column
- At Bottom of "Putts" Column, in the "Total" Block, Write in Total Putts for the Round

COMMENTS: _____

THE FITTING SCORECARD

This is a better approach to evaluating your equipment and game. If you will take the time to accurately fill out one or more of these "Fitting Scorecards," it just may turn out to be a real game improver.

Information from this exercise has many specific uses in evaluating strengths and weaknesses regarding your equipment, swing and overall golf game. From an equipment standpoint, the Scorecard will help fine tune any changes or recommendations in areas such as set makeup and equipment alterations.

Also it may aid in evaluating any swing

problem areas and can easily pinpoint those specific areas of needed practice to maximize your scoring potential. After each Fitting Scorecard is completed, look it over closely and see what you can determine about your own game.

The example analysis of the Fitting Scorecard is provided here to help you better evaluate your own Scorecard after it is filled out.

To fully maximize the use of the "Fitting Scorecard," it is suggested that the help of a golf professional be utilized in conjunction with the "Golf Club Fitting Plan." Ask your golf professional for complete details.

AN EXAMPLE ANALYSIS OF THE FITTING SCORECARD

- Use the Fitting Scorecard instead of your course scorecard.
- Read the instructions carefully at the bottom of the card.
- Notice Par 3's are circled and Par 5's are squared. Also the player's set makeup is circled and name, date, course, par and handicap are filled in.

- Statistics analysis and comments:
3 over on putting (36 putts par), zero 1 putts, three 3 putts, you hit 7 greens in regulation and missed 11 greens mostly left or short requiring many wedge shots and/or chips resulting in no up and downs (1 putt).

Comment: Improve wedge play, green hitting ability and putting. Find out why ball is generally pulled left of green when green is missed.

You hit 8 out of 14 fairways, missed 3 left and 2 right with 4 drivers being unsolid.

Comment: Driver inconsistent and unsolidly hit about 25% of the time. #3 Wood was not hit solid, but #5 Wood was solidly hit.

The irons are usually hit solid but left of the green and short.

Comment: Check for proper lie angles on irons or swing problem.

- General analysis and comments:
Check playability specs on Driver, #3 Wood and lie on irons. Also look at putter and consider a 3rd Wedge for better up and down scoring when green is missed.

A golf lesson from your professional or practice in specific weak areas is recommended.

- The more Fitting Scorecards that you fill out will provide even better data for analysis of your equipment, playing strengths and weaknesses.

Your golf professional should be consulted for opinions and recommendations.
