GLASS RACKS SPECIFICITIES

EFFICIENT WASHING

Warewashing can be labor intensive. If not well managed, it is likely to hurt your operation's bottom line and add unnecessary frustration. However, labor and efficiency is not the operator's only problem. The quality of your warewashing can directly effect your customers' health and the reputation of your establishment. If an effective system of cleaning and sanitation is not upheld, you may be facing risks on a daily basis that could jeopardize the future of your business.

Efficient Washing

Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying. Long-lasting polypropylene are built to withstand chemicals and high temperatures up to 200°F (93°C).

Open Wall Design

Open profile facilitates superior washing, complete rinsing, and fast drying.

Textured Finish

Non-slip textured finish on outside walls reduces scratches to keep racks looking new, improve durability, and provide a secure grip.

4-way Tracking

Easy dish machine loading from any side without the need to rotate racks.

SIGNATURE FULL-SIZE

GLASS RACKS Features

A complete selection of racks and accessories that provide outstanding strength, adaptability, versatility, and durability. An unbeatable value in today's foodservice operations.

Open Profile

Allows top-to-bottom and side-to-side washing, making the glassware cleaner. Allows noise air to circulate through the racks and makes faster drying and safer storing.

Stackability

Snap-fit construction shortens assembly time, and stacks all racks tightly.

Tight Connection

Snap-fit extenders will not loosen or rust over time like screws and will not come apart.

Convenient Handle

The handles on all four sides of the racks are convenient for safe delivery. Textured surface and convenient handles can avoid scratches when carried.

Guide Cards Groove

Different colored cards can be inserted to facilitate identifying storing items and improve work efficiency.

Glass Racks

Glass Rack Sizing Guide Instruction

- Place glass upside down on top of the middle circle of the sizing guide, center of the glass should be over the center of the guide.
- Look down on the base of the glass.
- Note the smallest square on the guide where the largest outside diameter of the glass lines up completely within the square without touching it. That is the number of compartments our rack needs to have.
- Place lip of glass against the base line of the vertical guide on the right-hand side of the page with the base/foot of the glass pointing straight up towards the top of the page.
- While holding the glass against the vertical guide, note where the base/foot of the glass lines up on the vertical guide. The next line above the base/foot on the guide indicates the number of extenders your rack will require.
- Glasses with a maximum height exceeding 242mm will need more than five extenders. Each extender adds approximately 40mm of additional height to the inside compartment of the rack.

CLOSED GLASS RACKS SPECIFICITIES

EFFICIENT WASHING

Ideal for storage and transportation to events, the rack's closed sides provide optimal protection against dust, bacteria, and insects. These convenient closed sides and their removable solid lids (sold separately) provide your employees with the opportunity to use the glasses between events without tedious re-cleaning. Unlike glassware stored in open side shelves, the closed design prevents clean glasses from getting dirty. Chemical, impact, and heat resistant for durability.

Efficient Washing

Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying. Long-lasting polypropylene are built to withstand chemicals and high temperatures up to 200F (93C).

Sanitary Storage

The closed outer wall can prevent fingers and contaminants entering.

Textured Finish

Non-slip textured finish on outside walls reduces scratches to keep racks looking new, improve durability, and provide a secure grip.

4-way Tracking

Easy dish machine loading from any side without the need to rotate racks.

Glass Racks

Square Food Storage Container

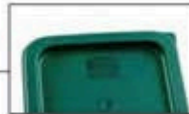

SPECIFICITIES

- Square shape maximizes storage space up to 25% better than round containers.
- Containers are constructed of virtually-unbreakable polycarbonate for superior longevity.
- Wide handles provide stability and have holes to facilitate fast drying.
- Included lids fit firmly on containers to keep all contaminants out and food fresh.

marked with contents

Contents and Date Indicators on Lid
Space space of the lid can be marked with contents and date indicators, convenient to keep the quality and freshness of food.

Textured Lid

Made of polyethylene, Non-slip textured surface is resistant to scratches and helps more stable stacking.

Stable Handles

Wide and Easy Handles
Wide moulded-in and textured finish handles in larger sizes ease carrying. Drain holes in handles allow for quicker drying. Wide cover handles save effort when transported and do not waste space.

Stackable lugs

Corner stackable lugs add strength rigidity and prevent jamming when stacked.

Date indicator

Date indicators on all four sides for easy recognition.

Textured Finish

All corners, edges, handles and the bottom are designed with textured finish. It can reduce scratches, increase service time and provide safe use.

PC Square Storage Container

Transparent polycarbonate allows for easy identification of products. Polycarbonate is extremely durable and stackable. Square shape allows for practical storage in the freezers and coolers. Withstands temperatures from -40°C to 99°C (-40°F-210°F) Colour: Clear.

PP Square Storage Container

Made of polypropylene, economical and durable. It's a good choice for food storage. Dishwasher safe. Withstands temperatures from -15°C to 80°C (5°F-176°F). Colour: Translucent/White.

Shelving Products

Winshelvings

Made of a steel core and polypropylene. Inner steel provides high intensity and durability. Exterior PP is anti-corrosion and break-resistant. Post connectors provide exceptional stabilization.

Page 103-116

Composite Shelving

Made of innovative high-strength composite materials so each layer can bear up to 200kg. It is comfortable to use because of its smooth, easy-to-clean surface and its post notch embedded.

Pages 117-124

Wire Shelvings

Grid structure ensures the flow of air which is helpful for temperature controlling. The sealed back and side panels can keep the bottles safe and prevent accidents. Front door with locks is for security.

Easy to adjust and install

It's easy to adjust and install.
With different sizes (3 heights, 4 widths, 6 lengths),
space utilization is highly increased.
The nets can be adjusted up or down by 100
millimeters with disassembly.
Shelves can be built to U-shape units with corner
connectors.

Absolutely firm, durable and stable

Made of a steel core and polypropylene.
Inner steel provides high intensity and durability.
Exterior PP is anti-corrosion and break-resistant
Post connectors provide exceptional stabilization.

Never rusty

Can be used anywhere, no matter moist or dry
weldless, never rusty.
Resists corrosion by brine or marine air.
Suitable for coolers and freezers, available
under -38 C.

Winshelvings

Basic Unit

The components of shelf can be formed into various specifications of basic units.

Vented Basic Unit

Solid Basic Unit

Add-on Unit

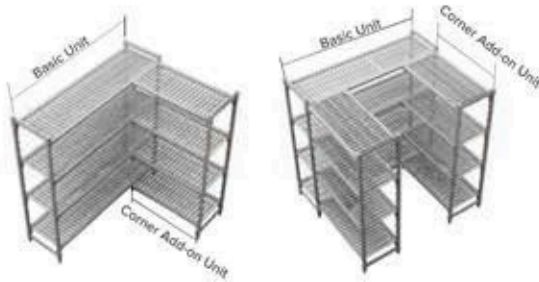

When added to a basic unit, the traverses on the first and second unit share the middle post. As a result, only two additional posts, instead of four posts or any add-on clips, are needed.

Basic Unit Add-on Unit

Corner Unit and U shape Unit

Corner connectors can build corner units and U-shape units. Traverses snap onto corner connectors just like they snap onto the dovetails of the posts.

Corner Add-on Unit

Mobile Unit

Inserting the specialized bolts into the casters to change the storage shelves into the move aluminum shelving system. Mobile units are unsuitable to be used as transporting cart.

Heavy-duty Dunnage Rack

To store frozen, cold and dry items 22.5cm safely off the floor. Rust free, corrosion proof and non-blending, the maximum weight load is 450kg. Different sizes of 3 lengths, 1 widths of corner connectors and dunnage stand are available. Above 1220mm size must be assembled with dunnage stands and corner connectors to make sure its loading capacity.

High Density Mobile Shelving Storage System

- Maximum storage capacity can be achieved by forming a storage channel in all available space.
- The mobile shelving storage system is composed of the basic units on the raised track, with high density movable shelves in the middle.
- Tracks are easy to be installed without drilling or bonding.

A: Stationary Units
B: Mobile Units
C: Track
D: Active Aisle

The track conveniently connects to the bottom of stationary shelving, no bolts or drilling into the floor are required. Using the connecting bolt to fasten the track.

Raised track provides a smooth surface for mobile units. It ensures dirt will not get trapped, and it is easy to clean. Shelves unit with heavy weight lands can roll smoothly on the track.

Grooved casters roll easily on raised track, which can be used on any surface. The caster with a bumper can provide protection.

High Density Mobile Shelving Storage System

Caster

High Density Mobile Unit includes 4 High Density Casters with 4 High Density Donut Bumpers. Weight bearing capacity of High Density Mobile Unit is 340kg. All necessary hardware is included in the track kit.

Composite Shelving

JIWINS Composite Shelving
Can be used in multi environment
from **-38°C to 88°C**

Made of innovative high-strength composite materials so each layer can bear up to 200kg.

It is comfortable to use because of it's smooth, easy-to-clean surface and its post notch embedded.

The shelf plate is added with the antibacterial agent of Microban brand in America, which can effectively inhibit the breeding of bacteria and ensure the safety and hygiene of stored products.

Buckle design makes installation and adjustment easier, and with good rust resistance. Products can withstand the influence by water, chemicals and other liquids. It can be used in the place under low temperature of minus 38 degrees and wet kitchen.
