

HI LINE

FRC & CRC2

HEAT RECOVERY SYSTEMS

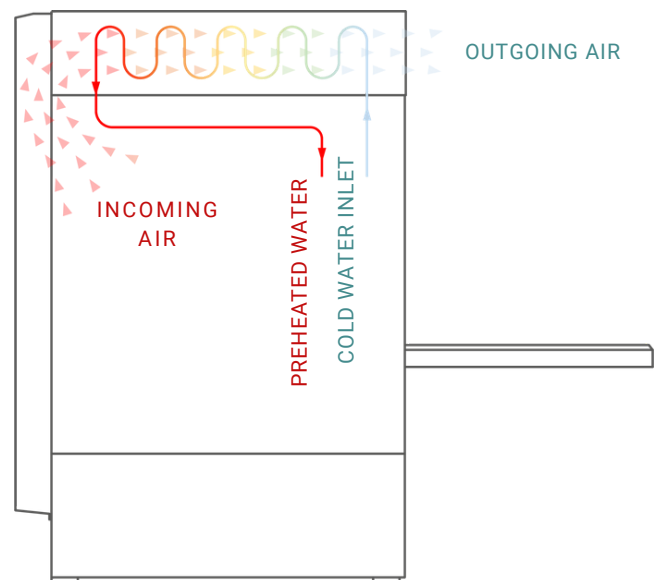

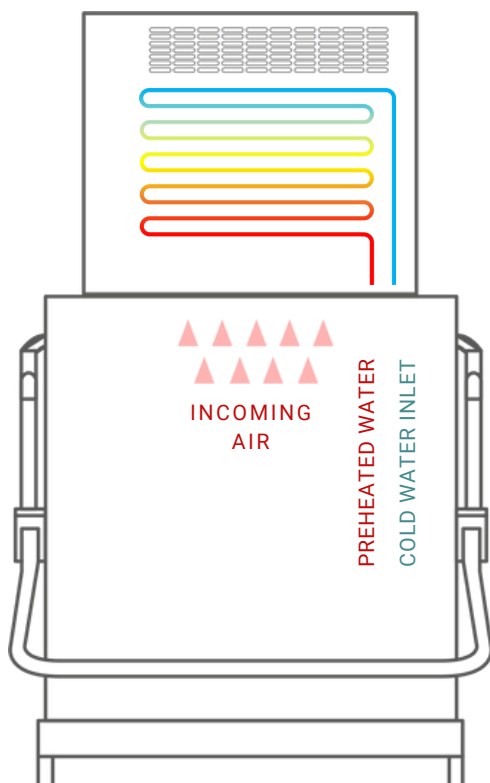

CRC2/FRC RECOVERY SYSTEMS

Our FRC and CRC2 heat recovery systems and steam condensers for Hi Line* undecounter and pass trough units use the heat already generated to warm incoming water. **Less water required, reduced heating needs, fewer chemicals or detergents involved – together, they positively impact your bottom line creating a more comfortable work environment.**

CRC2
-35%

FRC
-30%

*FRC: available for: HF45R, HF45RA, HB35R e HB35RA.

CRC2: available for: HC10 R, HC10 RA, HC14 R, HC14 RA e HCXL R, HCXL RA.

BENEFITS

We take our approach to ecological sustainability very seriously. Our equipment is built to perform in the most demanding environments daily and minimise energy and water consumption, reduce your operating costs as well as enhance comfort and safety for the operators.

COMFORT

Minimizing the steam released, we help to create a **more comfortable work environment.**

ECONOMY & ECOLOGY

-35% Energy Consumption.

SPACE SAVING

CRC2 footprint is the same as the overall size of the unit. **No need for additional space in your ware washing area!**

SAVINGS

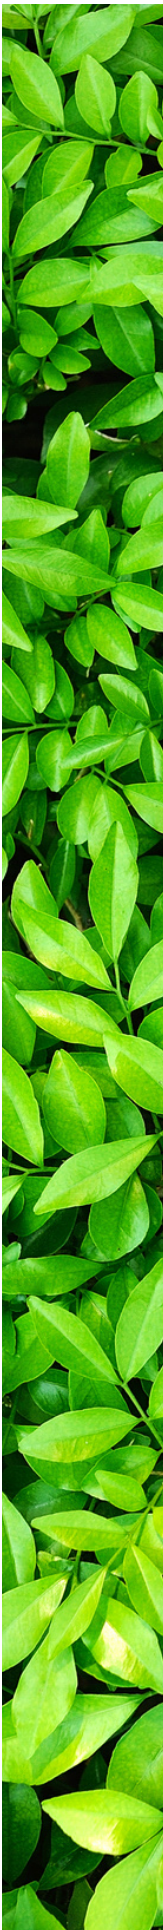

These systems permit a cold water connection while also **avoiding additional electric load.**

BRILLIANT RESULTS

The reduction of steam in the washing chamber also **contributes to speed up the drying of glassware, cutlery and crockery.**
