

4.0 REVOLUTION

Remote connection for tunnel units

C - SMART

Simple, intuitive and user-friendly, the new **C-SMART graphic interface with the remote connection** allows the operator to **easy monitoring the machine functions** and access a vast amount of information; **select the speed** based on the operations; **prevent possible failures** by managing the anomalies in real time **from smartphone, tablet or PC** and **keep the consumptions under control**: the continuous monitoring of water, chemicals and energy consumptions leads to a more environmentally conscious use of world's natural resources!

TOUCH SCREEN INTERFACE

REMOTE CONNECTION

EOR - EMERGENCY OVERRIDE SYSTEM

Simple, intuitive and universal, the Emergency OverRide System by Comenda (EOR) allows even unskilled staff to operate the unit in a basic but efficient mode and cope with unexpected PCB failures during operations granting consistency in washing with no downtime.

C- Smart is available as an option for:

- AC NEXT** rack conveyor units & **ACC** container washers
- NE & NG** flight type units
- LAV & LVP** tray and cutlery washers

TOUCH SCREEN GRAPHIC INTERFACE

YOU ARE IN CONTROL

The IP65 rated touch screen 7" panel allows the operator to:

- check the main operating parameters of the unit;
- start/stop the washing process;
- download RECORDS and HACCP reports of the dishwasher on a flash drive;
- access the alarm list and manage the anomalies;
- check notifications on the display when chemical dispensers are empty*, granting consistency during washing operations with no downtime.

* Please coordinate with your detergent dealer to activate this feature during machine installation.

BESPOKE INTERFACE

The C-Smart interface can be customised based on the washing phase activity and the type of flatware.

Dedicated Icons.

Customized quick guide into the individual alarms to give immediate and easy support to the operator in solving the problem.

Maintenance notifications for all components based on a number of pre-settled working hours.

CUSTOMISED SETTINGS

Your Comenda Certified Service Partner will be able to access a dedicated maintenance menu and modify the machine settings:

- Activation of APRS® function (option)
- Machine modules settings
- Modify the washing programs and related temperatures

COMENDA TRAINING CENTRE

Enjoy our training seminars on C-Smart for certified service partners and training sessions for kitchen operators!

REMOTE CONNECTION

Comenda C-Smart interface easily allows to remotely connect to the machine through a VPN gateway and a mini PC.

FREE SERVICES PACKED TOGETHER WITH C-SMART

SIEMENS SMART CLIENT

The SIEMENS SMART CLIENT App or Web Server allows to replicate the unit interface and remotely control the machine.

COMENDA CONNECT

By accessing to the Comenda Connect Web Portal, you can:

- Monitor all operating data of the unit;
- Check the alarm list;
- Download all records in various text formats on your PC.

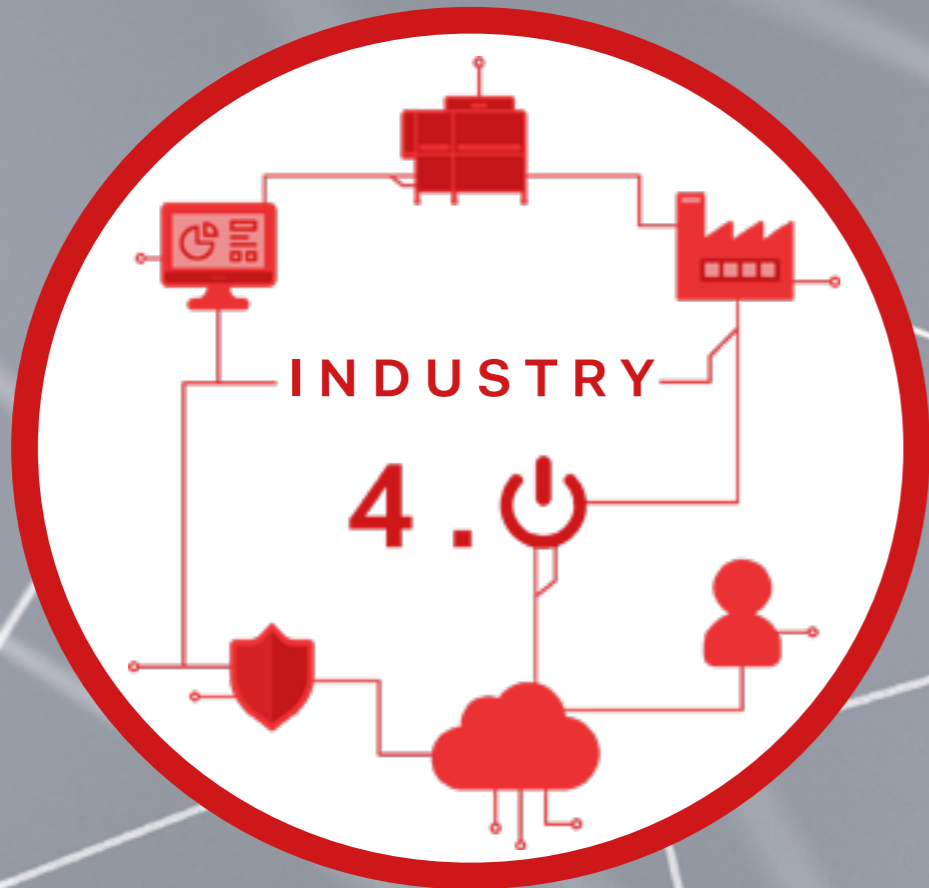

ALWAYS AT YOUR SIDE

No matter where the unit is installed, the remote connection allows Comenda service team to replicate the unit control panel, monitor the machine operations, modify or download software update and check the alarms for a prompt fixing.

Comenda tunnel units with C-Smart interface and remote connection are in compliance with "Industry 4.0" requirements.

BENEFITS

Energy, water and chemicals savings

With the remote connection it is possible to **check all data consumptions**. This gives the kitchen manager the power to **maximize work loads or schedule machine operations via smartphone, PC or tablet**.

Maintenance Optimized: quick fault-finding, problem solving and repairing

Checking the data and the machine status via smartphone, PC or tablet, allows the Comenda Certified service partner to **remotely monitor the alarms or unexpected failures and planning the calls out for fixing only if necessary**. This will considerably reduce the costs and the environmental impact!

Impeccable hygiene

The remote connection allows the customer to **access maintenance related data and statistics** for a complete control of the machine activity and the certainty of always obtaining the best results.
