New Customer

### Details of Service:

**Aeration:** We mechanically punch holes 1.5-2 inches deep throughout your turf areas on your property. The dirt clots are left on the turf areas. All turf areas are aerated twice in opposing directions. This ensures best results. Severly damaged turf areas may be aerated more than twice. Aeration does not include dethatching or raking dead grass. Some steep hills areas may not be aerated due to safety or mechanical issues.

**Overseeding:** We use top notch professional tall turf fescue grass seed. We spread grass seed at a pounds per square foot rate that ensures the best result. We do not seed zoysia or bermuda grass. For best results we recommend that our customers water at least 3 times a week for the following 2 weeks after we seed. We also suggest an application of starter fertilizer.

**Starter Fertilizer:** We use a child and pet friendly fertilizer that can be applied to enhance rapid growth of new seedings and feed existing grass. Starter fertilizer feeds up to 12 weeks and is a great way to ensure best results when seeding. If you do not want to use this service, we still recommend you apply starter fertilizer yourself.

\*If you have a lawn care service please notify them that you will be seeding
