

# Nan-O-Sil ASD®

## Safety Data Sheet

This Safety Data Sheet is prepared in accordance with the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) and OSHA Hazard Communication Standard (29 CFR 1910.1200).

### 1. IDENTIFICATION

**Product Name:** Nan-O-Sil ASD®

**Synonyms:** Amorphous Fumed Silica

**Product Use:** Performance enhancement and functional additive in industrial applications.

**Company:** Energy Strategy Associates, Inc.  
P.O. Box 203  
Spencertown, NY 12165 USA

**Contact:** Lizzie Magit  
CEO, Director of Operations  
lizzie@energystrategyassociates.com

**Telephone:** 347 204 9262

**Website:** [www.energystrategyassociates.com](http://www.energystrategyassociates.com)

### 2. HAZARD(S) IDENTIFICATION

**Classification**  
Not classified as hazardous under GHS.

**Label Elements**

**Pictogram:** None  
**Signal Word:** None  
**Hazard Statements:** None

**Precautionary Statements:**

**P261** Avoid breathing dust.  
**P264** Wash hands thoroughly after handling.  
**P271** Use only outdoors or in a well-ventilated area.  
**P280** Wear protective gloves, eye protection and a dust mask.

**Other Hazards**

May cause mechanical irritation to eyes, skin and respiratory tract.

### 3. COMPOSITION / INFORMATION ON INGREDIENTS

| Ingredient                           | CAS No.    | Concentrations |
|--------------------------------------|------------|----------------|
| Amorphous Silica (SiO <sub>2</sub> ) | 67762-90-7 | ≥ 99 %         |

No other components present that are classified as hazardous.

### 4. FIRST-AID MEASURES

**Eye Contact:**

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If irritation persists, get medical advice.

**Skin Contact:**

Wash with soap and water. Get medical attention if irritation persists.

**Inhalation:**

Remove person to fresh air and keep comfortable for breathing. If experiencing respiratory irritation, get medical attention.

**Ingestion:**

Rinse mouth. Do NOT induce vomiting. Seek medical attention if symptoms occur.

5. Fire-fighting measures

|                                                               |                                                                                                                                                           |
|---------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media                                  | This product is not flammable. If it is involved in a fire, use extinguishing methods appropriate to local circumstances and the surrounding environment. |
| Unsuitable extinguishing media                                | No limitations of extinguishing agents are given for this product.                                                                                        |
| Specific hazards arising from the chemical                    | Non-combustible, ambient fire may liberate hazardous vapors                                                                                               |
| Special protective equipment and precautions for firefighters | As in any fire, self-contained breathing apparatus and full protective clothing must be worn. Avoid breathing dust and contact with skin/eyes.            |

6. Accidental release measures

|                                                       |                                                                                                                                                                                                                                                                                                                            |
|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Personal precautions                                  | Ensure adequate ventilation. For personal precautions, see section 8 of the SDS.                                                                                                                                                                                                                                           |
| Protective equipment                                  | Wear personal protective equipment as described in section 8 of the SDS.                                                                                                                                                                                                                                                   |
| Emergency procedures                                  | Evacuate unnecessary personnel. Stop the flow of material, if this is without risk. Avoid the generation of dusts during clean-up.                                                                                                                                                                                         |
| Methods and materials for containment and cleaning up | Large Spills: Shovel the material into waste container. Following product recovery, wet down with water and dike for later disposal, flush area with water.<br>Small Spills: Sweep up or vacuum up spillage and collect in suitable container for disposal. Collect dust using a vacuum cleaner equipped with HEPA filter. |
| Environmental precautions                             | Avoid discharge into drains, water courses or onto the ground. For waste disposal, see section 13 of the SDS.                                                                                                                                                                                                              |

7. Handling and storage

|                                                              |                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Precautions for safe handling                                | Wear personal protective equipment. Minimize dust generation and accumulation. Provide appropriate exhaust ventilation at places where dust is formed. Avoid prolonged exposure. Avoid contact with skin, eyes and clothing. Do not ingest or breathe dust. Handle in accordance with good industrial hygiene and safety practice. |
| Conditions for safe storage, including any incompatibilities | Store in tightly closed container. Store in a dry and well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).                                                                                                                                                                                   |

8. Exposure controls/personal protection

Occupational exposure limits

| US. OSHA Table Z-3 (29 CFR 1910.1000)       |      |          |                     |
|---------------------------------------------|------|----------|---------------------|
| Material                                    | Type | Value    | Form                |
| Silica, amorphous (CAS 7631-86-9)           | TWA  | 5 mg/m3  | Respirable fraction |
|                                             |      | 15 mg/m3 | Total dust          |
| US. NIOSH: Pocket Guide to Chemical Hazards |      |          |                     |
|                                             | Type | Value    |                     |
| Silica, amorphous (CAS 7631-86-9)           | TWA  | 6 mg/m3  |                     |

|                                     |                                                                                                                                                                                                                                                                                                           |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Biological limit values             | No biological exposure limits noted for the ingredient(s).                                                                                                                                                                                                                                                |
| Appropriate engineering controls    | Good general ventilation should be used, and local exhaust ventilation should be used in any operation which may generate airborne dusts. If engineering measures are not sufficient to maintain concentrations of dust particulates below exposure limits, suitable respiratory protection must be worn. |
| Personal Protective Equipment (PPE) |                                                                                                                                                                                                                                                                                                           |
| Eyes/face protection                | Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133.                                                                                                                                                          |
| Skin protection                     | Wear suitable gloves and protective clothing to prevent skin exposure.                                                                                                                                                                                                                                    |
| Respiratory protection              | Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits, or if irritation or other symptoms are experienced.                                                                                                                             |
| General hygiene considerations      | Always observe good industrial hygiene practices, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.                                                                                  |

9. Physical and chemical properties

|                              |                                 |                                         |                          |
|------------------------------|---------------------------------|-----------------------------------------|--------------------------|
| Physical state               | Solid                           | Solubility (water)                      | Insoluble                |
| Form                         | Particulate Powder              | Partition coefficient (n-octanol/water) | Not available.           |
| Color                        | White                           | Auto-ignition temperature               | Not available            |
| Odor                         | Odorless                        | Decomposition temperature               | Not available            |
| Odor threshold               | Not available                   | Viscosity                               | Not applicable           |
| Melting point/freezing point | 3110 °F / 1710 °C               | Explosive properties                    | Not explosive            |
| Initial boiling point        | 4046 °F / 2230 °C               | Heat of combustion (NFPA 30B)           | 0 kJ/g                   |
| Flash point                  | Not applicable                  | Molecular weight                        | 60.08 g/mol              |
| Evaporation rate             | Not applicable                  | Oxidizing properties                    | Not oxidizing            |
| Flammability (solid, gas)    | Not flammable                   | Specific gravity                        | 2.2 at 25 °C             |
| Vapor pressure               | < 0.0000001 kPa (77 °F / 25 °C) | Surface tension                         | 5.2 mN/m (77 °F / 25 °C) |
| Vapor density                | Not applicable                  | Other information                       | Not available            |

10. Stability and reactivity

|                                    |                                                                     |
|------------------------------------|---------------------------------------------------------------------|
| Reactivity                         | Non-reactive under normal conditions of use, storage and transport. |
| Chemical stability                 | Stable under normal conditions.                                     |
| Possibility of hazardous reactions | No additional information available                                 |
| Conditions to avoid                | Contact with incompatible materials.                                |
| Incompatible materials             | Fluorine, oxygen difluoride, chlorine trifluoride                   |
| Hazardous decomposition products   | None known.                                                         |

11. Toxicological information

|                                          |                        |
|------------------------------------------|------------------------|
| Information on likely routes of exposure |                        |
| Principal routes of exposure             | Ingestion, inhalation. |
| Acute toxicity                           |                        |

|                                   |         |                 |               |
|-----------------------------------|---------|-----------------|---------------|
| Product                           | Species | Dose/Route      | Result        |
| Silica, amorphous (CAS 7631-86-9) | Rat     | LD50/Oral       | >5000 mg/kg   |
|                                   | Rabbit  | LD50/Dermal     | >2000 mg/kg   |
|                                   |         | LC50/Inhalation | Not available |

Symptoms

|                   |                                                                                                                                                 |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation        | May cause irritation of the nose, throat, and respiratory tract. When inhaled in very large amounts, damage to the lungs can occur.             |
| Skin contact      | May irritate the skin. Mechanical rubbing may increase skin irritation. May cause dryness in cases of severe exposure.                          |
| Eye contact       | May irritate eye tissue. Rubbing may cause abrasion of cornea. Symptoms can include irritation, redness, scratching of the cornea, and tearing. |
| Ingestion         | May cause irritation of the throat, stomach, and gastrointestinal tract. Not an expected hazard under normal use.                               |
| Aspiration hazard | No information available.                                                                                                                       |

Delayed and immediate effects as well as chronic effects from short and long-term exposure

|                                       |                                                                                                                            |
|---------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| Chronic toxicity                      | Prolonged skin contact may cause dryness. Chronic inhalation may cause lung damage.                                        |
| Sensitization                         | No information available.                                                                                                  |
| Carcinogenicity                       | IARC Group 3, not classifiable as to its carcinogenicity to humans. Not listed on OSHA HCS-Carcinogens. Not listed on NTP. |
| Mutagenicity                          | No information available.                                                                                                  |
| Reproductive toxicity                 | No information available.                                                                                                  |
| Specific Target Organ Toxicity (STOT) |                                                                                                                            |
| Single exposure                       | No information available.                                                                                                  |
| Repeated exposure                     | No information available.                                                                                                  |

| Silica, amorphous (CAS 7631-86-9) | Algae/aquatic plants                                                                                                    | Raphidocelis subcapitata | EC50 | 440 mg/L, 72h  |
|                                   | Crustacea                                                                                                               | Ceriodaphnia dubia       | EC50 | 7600 mg/L, 48h |
|                                   | Fish                                                                                                                    | Danio rerio              | LC50 | 5000 mg/L, 96h |
| Ecotoxicity effects               | Aquatic environment. Do not empty into drains.                                                                          |                          |      |                |
| Persistence and degradability     | No information available                                                                                                |                          |      |                |
| Bioaccumulative potential         | No information available                                                                                                |                          |      |                |
| Mobility in soil                  | No information available                                                                                                |                          |      |                |
| Other adverse effects             | No other adverse ecological effects (ozone depletion, global warming potential, etc.) are expected from this component. |                          |      |                |

13. Disposal considerations

|                                     |                                                                                                                                                                                     |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Disposal instructions               | Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose in accordance with all applicable local regulations. Do not dispose into sewer.        |
| Hazardous waste code                | The waste code should be assigned in discussion between the user, the producer and the waste disposal company.                                                                      |
| Waste from residues/unused products | Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner. |
| Contaminated packaging              | Follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.                               |
