AI- Eye in the sky

Advanced Security Solution for Smart Perimeter Protection

A-EYE is an advanced and innovative security solution, combining artificial intelligence, high mobility, and smart systems to deliver comprehensive perimeter protection for villages, agricultural communities, military facilities, and strategic sites.
The modular system enables rapid deployment, providing 24/7 real-time threat detection, seamless integration with command centers, and direct connectivity to mobile security patrols.

- **AI-Powered Smart Surveillance**

Advanced video analytics for real-time detection of suspicious movements and behavior, including object classification and threat identification.

- **PTZ Cameras with Advanced Analytics**

Pan-Tilt-Zoom cameras with automatic tracking, facial and license plate recognition, and focus on critical zones based on activity patterns.

- **Rapid Deployment & Mobility**

Modular system designed for dynamic terrains, deployable without fixed infrastructure, enabling wide-area adaptive protection.

- **Day & Night Monitoring with Infrared**

Smart cameras equipped with cutting-edge infrared technology ensure visibility and threat detection in all lighting conditions —even total darkness.
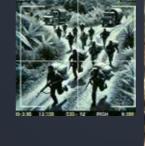

- **Proactive Alert System**

Integrated sensors, AI, and video analytics deliver real-time automated alerts to control centers and security forces.

Secure your perimeter with next-generation

defense — deploy A-EYE today

D-Fence

D-Fence is a leading provider of advanced perimeter security solutions, delivering cutting-edge systems for the protection of strategic facilities, critical infrastructure, residential zones, and military installations.

With years of proven experience in the security field, D-Fence integrates innovative technologies to offer flexible, reliable, and effective solutions tailored to every security need.

- **Direct Link to Command Center & Mobile Patrols**
Integrated with control centers for instant deployment of rapid response teams, including real-time video streaming and GPS-based location sharing.
- **Customizable & Scalable to Your Needs**
Easily expanded and configured based on area size and required security levels.
- **Real-Time Encrypted Communication**
Secure data transmission between field units and command, fully synchronized with existing security systems.
- **High Durability in Harsh Field Conditions**
Built with rugged materials for reliable performance in all weather and terrain conditions.
- **Solar-Powered Operation**
Enables continuous functionality in off-grid areas while reducing energy consumption.
