

INSTRUCTION SHEET FOR FLEAS AND TICKS

ALL PESTICIDES WILL BE USED IN ACCORDANCE WITH MANUFACTURER'S LABEL

TO WHOM IT MAY CONCERN:

In order to give you the best possible service, with the least inconvenience to you, we would appreciate your cooperation with these instructions before and after our technician treats your premises. In the event that everything is not ready, another appointment will have to be made by the client. Please take a few moments to read and become familiar with the content.

BEFORE

Vacuum all areas including pet resting and sleeping areas. Particular attention should be paid to areas between the baseboard and floor, closets, behind and on upholstered furniture. After vacuuming, the vacuum bag should be disposed of outside the premises to avoid it becoming a flea reservoir leading to re-infestation.

1. All clothing, toys, pet dishes, etc., must be picked up from the floor and closets. Pet beds should be removed and cleaned.
2. Aquariums should be sealed off with plastic wrappings, and filter turned off for a four (4) hour period.
3. Beds should be stripped.
4. Pets should be treated with a flea control product (at the time of service) and kept off treated areas until completely dry.
5. All windows should be closed for maximum effect.
6. **NOTE:** All persons must vacate for four (4) hours. Persons with ailing health or pregnancy must vacate for twenty-four (8) hours and/or follow their doctor's advice.

AFTER

1. Upon returning to the premises, open the windows for a short period of time.
2. After treatment, vacuuming will reduce the number of fleas. Dispose of vacuum bag immediately.
3. Old bedding of pets should be removed and replaced with fresh clean bedding.
4. Turn aquarium filter back on

NOTICE

State law requires that you be given the following information:

If within 24 hours following application you experience symptoms similar to common seasonal illness comparable to the flu, contact your physician or poison control center and Pro-Pest Solutions immediately.

For further information, contact Pro-Pest Solutions at **541-961-5627**.
