**Subject:** Meeting with SD43 Trustee and SD43 facilities manager  
**Date:** Friday, September 15, 2017 12:17:37 PM

---

I met today with SD 43 Trustee Kerri Palmer Isacc- McEwen and Ivano Cecchini- facilities and planning services. I updated them all on the current state of affairs. Including my meeting with Greg Moore and Mayor Clay. I also expressed that Anmore Council has chosen to NOT dialogue with me despite my best efforts. (Kerri got that message loud and clear) They expressed to me that they also would like this solved and however unsure what roll they play.

Further, Mr Cecchini expressed that their tests have shown NO fecal coliform counts are present after they diverted the surface water into the catch basin, he also expressed that they chose to interpret the 2013 Keystone report as coming from Bears/deer/squirrels rather than the obvious failing septic system serving the human waste of 51 homes and 125 humans brown water. I called him out on this and he said it was the only way to justify the diversion of water into the drainage system.

I asked Kerri to use her connections to open dialogue on solving this issue, but I'm guessing she will do nothing to counter mayor and council.

Regards
