

BB GLOW AFTERCARE

To maximize the procedure, it is important that you follow the procedures listed below prior to your scheduled visit.

- There will be some discomfort and a warm sensation in the treated area for 24 hours following treatment.
- Swelling and redness will occur and usually subsides after 48 hours. It is quite normal for mild sensitivity and redness after treatment.
- The skin may resemble a moderate sunburn, as the skin naturally heals the redness will resolve. The skin may remain red for three to four days after treatment, although it is usual for it to subside within two days and many people are able to return to their normal activities.
- Do not use any perfume, perfumed cosmetics or skincare products, or any fragrance products, use only repair cream.
- If you experience any adverse reactions that appear to be attributed to the use of the home care products, you must discontinue the use of them.
- Hands should be thoroughly washed or sanitized before touching the treated skin area or applying skincare products to the area, immediately after and in the first few days after the procedure.
- Dryness and flakiness will occur and can possibly scab. This can last up to 7 days post-procedure.
- The skin will look dry for a few days and we recommend the use of repair cream.
- All facial skin procedures, excluding injection-based treatments, should be avoided for 1 month after treatment.
- Direct sun exposure and tanning bed use are strictly prohibited, and sun protection of at least SPF 50 must be used at all times even when there is overcast or it is raining. If you fail to protect your skin from sun exposure, you will be at risk of uneven pigmentation and sunburn.
- Use of saunas and any heat treatments are not recommended for a period of at least 2 weeks after the procedure.
- It is advisable not to participate in strenuous activities for 5 days after treatment to minimize side effects.
- Makeup should not be worn for 24 hours post-procedure and then we recommend using mineral makeup thereafter.
