- Nasal valve augmentation
- Otoplasty and reconstruction
- Facial reconstruction with local flaps

FACIAL PLASTIC SURGERY CADAVERIC DISSECTION COURSE

6th-8th May 2025 Nottingham

PROGRAMME

This course offers an intense three-day programme using lab-based dissection on fresh frozen cadavers. Various techniques in rhinoplasty and aging face surgery will be discussed and demonstrated by world leaders in the field, and the delegates will practice these techniques on cadavers.

Our goal is to provide you with an excellent educational experience and familiarise our participants with common facial plastic surgical and non-surgical procedures.

COURSE HIGHLIGHTS

- Renowned international and national faculties in the field of facial plastic surgery
- Hands on step-by-step fresh frozen cadaveric dissection with minimal lectures
- Each delegate will receive course manual with clear practical surgical content and video demonstrations of injectable techniques
- One to one teaching by experienced faculty who are passionate teachers
