6. Get the Details of your FTP account click on **Configure FTP Client**. Note down your FTP Username, Server and Port number at **Manual Setting**.

The screenshot shows the cPanel interface for managing FTP accounts. At the top, there's a search bar and a 'Go' button. Below that, a table lists the FTP accounts. The second account, 'rdltest@cloudplc.in', has its 'Configure FTP Client' link circled in red. Below the table, the 'Manual Settings' section is also circled in red, displaying the following information:

- FTP Username: **rdltest@cloudplc.in**
- FTP server: **ftp.cloudplc.in**
- FTP & explicit FTPS port: **21**

At the bottom, there are three options for downloading configuration files: FileZilla (for Windows), CoreFTP (for Windows), and Cyberduck (for Mac), each with a corresponding 'FTP Configuration File' download button.

7. Download **FileZilla** give the FTP credentials and the Test the Connection
