The ignition point, Getting fired!!!

Early 2016

- Gets fired from a high level geoscientist job due to volatile market conditions after spending 11 years of global professional career as a Geoscience Specialist. Unsuccessful to get a Job despite receiving Best Geoscientist Award from ADIPEC. Starts looking to change careers, becomes unsuccessful there as well. Starts looking deeper into this intellectual Sustainability issue. Incubates ENHEROES a global community of Entrepreneurial SuperHeroes to address this problem someday.

Getting into Self reflection mode

Late 2016

- Gets introduced to Global Goals 2030 and vows to find an effective way to make the world a better place while undertaking independent research on Intellectual Sustainability. He starts working on building a solution to address the challenges of global intellectual burden.

Bootstrapping, grinding, being Jobless a Choice

2017

- Decides to become full time Entrepreneur in Residence to commit into the research on Intellectual Sustainability and continue bootstrapping to turn his Idea of using Technology, Business & Intellect together as a force for Good to create a positive collective impact. Learns about AI, Blockchain & XR from internet and Design Thinking from MIT.

Crafting the Idea of shaping a Responsible Digital Energy future

2018

- Incorporates ENHEROES GLOBAL ENERGY from his own savings and raises funds from family & close friends and continues the in-house research and development activities to build a tech driven business meant to solve sustainability challenges.

Ensembling Sustainability ,The Eureka Moment

2019

- Finally discovers the missing link in his theory of Intellectual Sustainability and conceptualizes the idea to build a deep tech responsible business ecosystem of shared values in a new kind of Co-Benefit model that would be capable of solving World's most pressing issues in a collective impact manner. Starts designing the architecture of world's first smart & autonomous software for Global Goals 2030 using AI-Blockchain-XR.

Building a Better World Together

2020

- Successfully invents an AI-Blockchain-XR based operating system of Cognitive intellectual sustainability and fills a utility patent (Application no PI2020002081) for it. Becomes the first ASIAN tech entrepreneur to achieve this accomplishment. His work gets featured in media and receiving recognition in peer circle for tenacity and vision of an inclusive responsible future resilient to Covid19 kind pandemics.. He gets ready to launch his debut book and complete fundraising campaign by early of 2021.

Launching the Prototype of World's First Responsible AI Super Console

2021

- Launches prototype of a Cognitive Intellectual Productivity AI Console to ensure a Sustained facilitation of Learning , Earning , Innovation & Starting up resources for Communities & Corporations using his Digital Invention.

Building A Better World Together

Digital Energy As a Force for Good
