S.C.A.A. Annual Membership Meeting

Thursday, June 5

7:30 PM - Business Meeting 8:30 PM - Film and Panel of Archaeologists

All Welcome!

Northport Historical Society Museum
Main Street, Northport (opp. Firehouse)

S.C.A.A. Activities: The Board has been moving in many directions in past months, and we welcome the participation of members in any area you choose to work. Particularly, we ask that you contact your county legislator and let him know of your concern for prehistoric and historic site preservation.

Agencies which have been contacted by S.C.A.A. are all appropriate agencies of county government, the State Commissioner and Counsel of Environmental Conservation, the Environmental Protection Agency, the Federal and State Departments of Transportation, Brookhaven Town Supervisor and Planning Board Chairman, the County Council on Environmental Quality, and the various historical, preservation, and environmental groups in the County. Contact has been made, but it will take a sustained effort by all of us to educate county and state government to its responsibilities in this area. A long-overdue effort is now being made on behalf of wetlands, farmlands, and park lands before it is too late -- and now archaeological sites should be protected also.

Some action has occurred: County Executive Klein says he supports our concerns for preservation and for a county natural history museum; two County Parks Department officials attended the L.I. Archaeology course at SUNY, Stony Brook; Ed Johanneman is now a Summer employee of the Parks Dept. working at the newly-acquired Montauk park land site of the last of the Montauk Indians, the old site of Easthampton Village, and other irreplaceable segments of L.I. history. Let Parks Commissioner John Chester know of your support for increased archaeological activity by his department. The ideal situation would be a Parks Department supported on-going excavation for college kids, high school, and junior high school kids, as well as interested adults.

S.C.A.A. has also written proposals for photographic equipment to better record excavations, materials, projects, etc., and for a BOCES II State Education Dept. Minigrant to develop a prototype Museum-in-a-Box on L.I. Indians/Archaeology. S.C.A.A. brochures have been mailed to members by several historical societies, and displayed by many societies and museums.

Contact has been made with the N.Y. Archaeological Council, and we hope to have Executive Director Thomas King, stationed at the U. of Buffalo, down for a conference this year.

Encounters In Thinking: A Compendium of Curricula for Process Education is published by the Creative Education Foundation, 1300 Elmwood Ave., Buffalo, N.Y. 14222. Process education is defined as those adaptive behaviors which underlie all creative activity and which the learner engages in to acquire, organize, and utilize information and experience for effective problem solving and productive living."

Two anthropologically-oriented curricula thought to have potential in process education were listed, (1) Man: A Course of Study, developed by Jerome Bruner, Peter Dow, Asen Balikci, Irven DeVore and other scholars and distributed by Curriculum Development Associates, 1211 Connecticut Ave., NW, Washington, D.C. 20036, and (2) MATCH Project (Materials and Activities for Teachers and Children), developed by Frederick Kresse of the Boston Children's Museum and its staff on The City, A House of Ancient Greece, and Japanese Family, and distributed by American Science and Engineering, 20 Overland St., Boston, Mass. 02215.

We would like to hear from any teachers or schools who have used either of these new approaches to social studies and anthropology. Please call 878-4070.

A new twist to the usual archaeological recording techniques -- cassette recorders instead of field log and cameras to supplement the usual stratigraphic profiles and mapping -- was tested by Jim Shea, Ben Werner, Jr. and Mickey Cusano last Spring in Setauket, searching for the lost village of "South Setauket" at a site destined for the bulldozer. Jim received a grant from the Regional Documentation and Exhibition Workshops sponsored by the N.Y. State Historical Assn., funded by the N.Y. State Council on the Arts in part. All participants were taught the oral and visual techniques prior to the beginning of the historic-era dig. Over 200 volunteers responded to the request for diggers, and about 35 were chosen for the training.

Latest Books on Archaeology:

Archaeological Researches in Retrospect, Gordon R. Willey, Winthrop Pub-. lishers, 1974. A unique approach to the problem of where archaeology as a discipline has been and where it is going. Willey organizes the reflections of 10 outstanding New and Old World archaeologists on one of their research problems of the past, the original motivations, the strategies employed, how results were perceived at the time, and how he would now do things differently with hindsight and the changes in archaeology.

History of American Archaeology, Gordon Willey and Jeremy Sabloff, Freeman, 1974. The first book-length history of American archaeology by professional archaeologists, it is an intellectual history with an emphasis on concepts and a delineation of the four periods of American archaeology, the state of current archaeology and its development,

profusely illustrated, with extensive bibliography.
