

# CALIFORNIA CRYOBANK

## ABOUT US

California Cryobank is a reproductive tissue bank founded in 1977 to provide physicians and patients with a comprehensive resource for fertility preservation and specialized services. For 40 years, we have helped thousands of individuals to preserve their fertility.

California Cryobank has grown into one of the largest reproductive laboratories of its kind with an unparalleled focus on quality and service. We are accredited by the AATB (American Association of Tissue Banking), certified by CLIA (Clinical Laboratory Improvement Amendment), licensed by the California and New York health departments and are registered with the FDA (see cryobank.com for details.)

## SEMEN, EMBRYO, AND EGG STORAGE

Advances in the fields of oncology, urology, and reproductive biology are providing men and women the opportunity to preserve their fertility. It is now a common practice for men and women to store their reproductive tissue prior to undergoing medical procedures that may result in a loss of fertility.

Freezing of these reproductive tissues allows individuals to make the best treatment decisions possible without the concern that they may be compromising their future ability to have children.

## BENEFITS OF STORING AT CALIFORNIA CRYOBANK

- > No account set-up fee required
- > Over 40 years of cryogenic storage experience
- > Maximum certifications and licenses

## SAFE & SECURE

- > 24-hour video surveillance and monitoring
- > Access controlled via magnetic locks and coded pass cards

# SEMEN STORAGE

## REASONS FOR SEMEN STORAGE

Cryopreservation offers the ability to preserve fertility in the following scenarios:

- > Cancer-related therapies
- > Testicular or prostate surgery
- > Pre-Vasectomy
- > Assisted reproductive procedures
- > High risk occupational exposures
  - Athletes at risk for testicular injury
  - Military or emergency services personnel
- > For husbands who travel frequently
- > Oligospermia (low sperm count) patients
- > Transgender Hormone Replacement Therapy
- > Spinal Surgery

Once collected and frozen, specimens may be stored indefinitely. Successful pregnancies have been reported from specimens frozen up to 28 years.

*"Semen cryopreservation is very important for men undergoing a variety of procedures...And to perform this important task, I trust no one more than California Cryobank."*

*Dr. Philip Werthman, MD FACS  
Director of the Center for Male Reproductive Medicine*

---

## THE SEMEN STORAGE PROCESS

Call California Cryobank to schedule an appointment which will include:

- > Professional consultation
- > Semen collection for analysis and freezing
- > Infectious disease screening

Additional semen collections are possible if necessary. You own your specimens and you may retrieve them at any time.

**Call your local California Cryobank branch to schedule an appointment** (phone numbers are listed on the back of this brochure).

---

*"Advances in infertility treatments have greatly increased chances that cryopreserved sperm can be used to conceive a child...even storing one ejaculate may provide enough sperm to conceive a biological child."*

*Banking on Becoming a Father. Schoever, LAUA News, March 2003*

# EMBRYO & EGG STORAGE

## A LIFETIME OF TOMORROWS CAN BE STORED TODAY

California Cryobank has provided peace of mind to thousands of individuals with our specialized embryo and egg (oocyte) storage services.

## REASONS FOR EMBRYO AND/OR EGG STORAGE

- > Protecting fertility at risk due to an illness such as cancer
- > Family planning goals are still in progress and you want to save embryos and/or eggs for future assisted reproductive procedures
- > High cost of continued storage at IVF clinic

*"Thank you for everything you and California Cryobank did for me. I delivered a healthy baby boy September 2016 named after his father. Thank you and everyone at California Cryobank who was a part of this process."*

*Cryobank Client*

---

## THE EMBRYO AND EGG STORAGE PROCESS

- > Your physician harvests, processes, and freezes your embryos and/or eggs.
- > Contact California Cryobank by phone to complete all the necessary forms.
- > California Cryobank coordinates the transfer of your eggs and/or embryos to our facilities where they are safely stored in cryogenic storage tanks and monitored daily.
