

Technical Support

If you are planning to convert an FV to an FST (or build from scratch) you will probably have some questions. At least you SHOULD have. Don't go down this road by yourself. Some suggestions:

- If you haven't already, visit one of our races and take a look at a car and ask questions.
(Contact anyone on this site and we will get you in as crew.)
- Read the SCCA GCR (both General and FST Specs)
- Peruse the Technical Articles here.
- Visit the First BBS at this website and join. You can get lots of help there.
- Consider Joining the Formula First Driver's Association. (Contact Robert or Jim below.)
- Contact one of the below for suggestions/advice.

Larry Campbell lcampbell@new.rr.com	Larry has built several FST's and has been through all the administrative and technical issues many times.
Robert Guhde fst@rochester.rr.com	Same here Robert is current Formula First Driver's Association Director
Jim Schings jim@sracing.com	Jim has done many conversions and knows all the parts you need including engines.
