Persuing excellence in design and fabrication for over 50 years

TubeCo Pty Ltd are your specialist manufacturers of metal beds and bunk beds and have over 50 years' experience in the metal fabrication industry.

Each of our products are handcrafted and quality controlled to ensure that each product leaving our factory is nothing short of perfect.

We pride ourselves on the strength, durability and quality finishes of each of our products we manufacture.

Why choose TubeCo

Besides our obsession with quality, strength and durability, TubeCo are Australian owned, producing Australian made products and keeping Australians employed. We manufacture our products in our Sydney factory from raw materials through to the complete finished and powder coated product. All of our products are made to order yet we are still able to keep our lead-times to a minimum.

Our in-house capabilities mean we are able to offer customer orders and a wide range of powder coat colours. We deliver to the Sydney metropolitan area and also have contacts in the freighting industry meaning we can provide cost effective freight options nationwide.

Our products

Our 100% Australian-made commercial range of products is expertly crafted for high use accommodation environments. Each product features our innovative in-house taper system and durable weld mesh bases. These bases not only provide additional strength but also help keep bed bugs at bay, promoting a cleaner, more hygienic environment. Our unique male/female connection becomes stronger with time and use, ensuring long-lasting durability. Unlike other products on the market with only tack-welded joints, our fully welded designs enhance strength and reduce the risk of internal corrosion. All of our bunk beds adhere to the Consumer Protection Notice (CPN), also known as the Orange Tick, guaranteeing safety and quality.

Manufactured in Sydney, we are able to offer you the flexibility to select a powder coat colour that seamlessly complements your corporate branding or interior decor.

When beds are used every night, strength matters. At TubeCo we build them here, build them tough, built to last!

Warranty

We're so confident in all our Australian made products that we offer a 10 year manufacturers warranty.

Haven't answered all your questions?
